Temperature sensor

High-resolution, 5-inch color LCD screen

**High-resolution, 5-inch color LCD screen**

Clearly see every little move right from the parent unit. When you check in on your baby, you'll feel like you've never left the room.

**Night light on baby unit**

A soothing light on the baby unit gently illuminates a dark nursery. Choose from three different colors. Enable the Auto-on feature to turn the night light on when noise is detected to help soothe your baby back to sleep.

**Soothing sounds and lullabies**

Five calming melodies and four soft ambient sounds, including a trickling stream and white noise, help your baby slip into a sweet slumber.

**Two-way, talk-back intercom**

Sometimes all your baby needs is to hear the sound of your voice. Comfort your infant from any room with the built-in intercom on the portable parent unit.

**Temperature sensor**

Keep your little one cozy. The temperature indicator on the parent unit lets you know when it's time to adjust the thermostat.

Up to 1,000 feet of range

Wall-mountable

Automatic infared night vision
