## Product components

**Please check the components before use.**

| | |
|---|---|
| Case | 1EA |
| Battery | 1EA |
| Quick start guide | 1EA |

## How to use the power bank

**Smartphone case and power bank combination**

Slide the phone into the case from the top down. Move around slightly to make sure it fits properly.

There is a built-in iron plate inside the case. Be careful not to lose it

## How to use the power bank

**Charging the power bank**

Connect the Lightning cable to the power bank to charge.

It is recommended to use a MFi certified Lightning cable, and an adapter that supports 7.5W or higher power.

* Do not charge more than 24 hours.

* Up to 10W (5V2A) can be charged using the fast charging adapter.

## How to use the power bank

**Smartphone wireless charging method**

After placing the power bank on the back of the smartphone and then pressing the power button, the LEDs light up and wireless charging begins.

Do not charge the smartphone without the smartphone case.

Ensure there are no foreign metal objects (cards, magnets etc.) between the power bank and the smartphone.

## How to use the power bank

**Simultaneous charging of the power bank and the smartphone**

Normal method

Simultaneous charging is possible by connecting the Lightning cable to the power bank and after combining the smartphone with the power bank.

Other method

Simultaneous charging is possible by combining the smartphone with the power bank and then connecting the power bridge of the power bank cover.

It is not necessary to press the power button if the smartphone is connected to the power bank within 10 seconds.

## LED indicator lights

**Normal charging mode**

You can check the remaining battery level using the LEDs on the Side of the product.

| 0~15% | 16~35% | 36~65% | 67~100% |
|---|---|---|---|

**Indicator indication (under 5%) - 1 LED blinks**

**Charging status**
While charging, the LEDs blink as below.

| 0~33% | 34~66% | 67~99% | 100% |
|---|---|---|---|

**Simultaneous charging mode**

You can charge the power bank and the smartphone at the same time.

The LEDs only blink for the first 15 seconds of charging

**Simultaneous charging**

The LEDs blink sequentially from bottom to top, and then the LEDs flash according to the remaining battery level.

| 0~33% | 34~66% | 67~100% |

## Product Specification

| | |
|---|---|
| **Product name** | STATIC Power bank |
| **Materials** | PC/ABS |
| **Manufacturer** | SHATTE |
| **Country of origin** | ROMANIA |
| **Trade name or applicant** | STATIC |
| **Equipment name** | Power bank |
| | Wireless charging |
| **Battery rated capacity** | 5000mAh |
| | Secondary Li-Polymer |
| | 3.7V~4.2V(Max) |
| **USB input / Wireless output** | 5.0V=2.1A / 5.0~9.0V 1.1A |
| **Wireless charging frequency** | 110.5~205.5 ~ 148KHZ |
| **Output power(s)** | 14.2 (Max)W or 10w, 10W |
| | 110.5~205.5 ~ 175KHZ |
| | 15.5W (Max)W or 10W, 10W |
| **Weight / Size / Battery type** | iPhone XXS/11Pro |
| | Case: 70g/156.8x78.1 (mm) |
| | Battery: 200g/150.08x77.1(mm) |
| | 150P/1Q/5A/A |
| | iPhone XR/11 |

| | Battery: 240g/7961/156x71.5(mm) |
| | 150P/1Q/5A/A |

## Precautions

1. Charge the product fully before the first use.
2. Avoid using to use charger to charge the product, as their voltage and current may vary.
3. Do not disassemble the product, or use the product for any purpose other than that for which it was designed.
4. Do not place the product near or in heat sources such as a car, in places that can become hot easily, or near a heat source.
5. Store and use at temperatures between 0 and 40°C.
6. Do not charge or have remaining surfaces such as carpets, blankets, sofas, beds, etc.
7. Do not use the product to shock, moisture, fire, sensitive skin, etc.
8. Do not allow the product to come into contact with water.
9. Only charge the product using a charger of appropriate voltage.
10. Do not use the product while it is charging.
11. Do not let the product in an environment where it may be damaged by pets.
12. If the product blows due to battery malfunction, discontinue use of the product immediately.
13. If the product is not used for an extended time period, charge the battery to 50% capacity every month.
14. This product is not waterproof, and no compensation shall be given in case of water damage.
15. Ensure that no conductive foreign materials enter the charger port. Such materials include metallic objects such as coins, hairpins, pencil cores, lead books, traffic cards, etc, as the product may cause fiery damage.
16. Do not place in close proximity to computer monitors, televisions, or other similar electronic products.
17. When charging wirelessly, the product's temperature may increase slightly, so the smartphone may become hot; especially when using apps or games that use a significant amount of power.
18. Do not place the product in a microwave oven.
19. When disposing of a used battery, do not place it in an incinerator or fire. Excessive heat may cause an explosion or fire.
20. When disposing of a secondary cell or battery, separate cells with different electrochemical systems and dispose of them separately.
21. Remove battery residual, dispose of used batteries in a discharged state.
22. We recommend that the smartphone battery is charged wirelessly without the smartphone case attached.
23. The manufacturer accepts no responsibility for damage to the product due to user negligence.
24. The warranty period for the product is 1 year from date of purchase.
25. Requires 7.5W or above Wall Charger.

**FCC Part 15.19**
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**FCC Part 15.21**
Any changes or modifications (including the antennas) to this device that are not expressly approved by the manufacturer may void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**RSS-Gen 8.4**
This device is a low-power transmitter(intentional) that complies with Innovation, Science and Economic Development Canada's licence-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) This device may not cause interference.
(2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée en vertu des deux conditions suivantes :
(1) le dispositif ne doit pas produire de brouillage,
(2) l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

**FCC and ISED RF Radiation Exposure Statement:**
This equipment complies with FCC and ISED RF Radiation exposure limit set forth for an uncontrolled environment. This equipment should be installed and be operated at operating in conjunction with any other antenna or transmitter subject to compliance with FCC rules must be maintained a minimum distance of 20 cm between the radiator and your body.
