Warning:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
FCC Caution: To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

BF Exposure Statement
To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

INTRODUCTION

Congratulations and thank you for purchasing your new Ashdown Engineering amplifier and welcome to the family! We really think you've made the right choice and trust that the amplifier will give you years of pleasure and service.
Ashdown Engineering amplifiers are designed to last a lifetime, through the use manual which will help you get the most out of your amplifier, we've included some tips and tricks to get you up and running and various contacts.

Thank you for purchasing our new Ashdown Engineering amplifier. Our goal was to create a lightweight, easy to use amplifier that delivers the classic Ashdown tone, but in a new and exciting way. We have spent many hours voicing the amplifier to ensure it delivers the tone you expect from Ashdown, but with the versatility you need for today's gigs.
The Eliza is our flagship amplifier, it's the most versatile amplifier we've made and we've packed it with everything we could think of to make it the most versatile amplifier we've made. We've included a wide range of effects, a stereo FX loop, a USB port for firmware updates, a USB port for connecting to computer and a Bluetooth receiver so you can stream music to the amplifier from your favourite device, so no matter what you're playing, you can be sure it will sound great.
We've included a wireless footswitch so you can control the amplifier from the stage, and we've included a wireless footswitch so you can control the amplifier from the audience!
We've included a wireless footswitch so you can control the amplifier from the audience!
