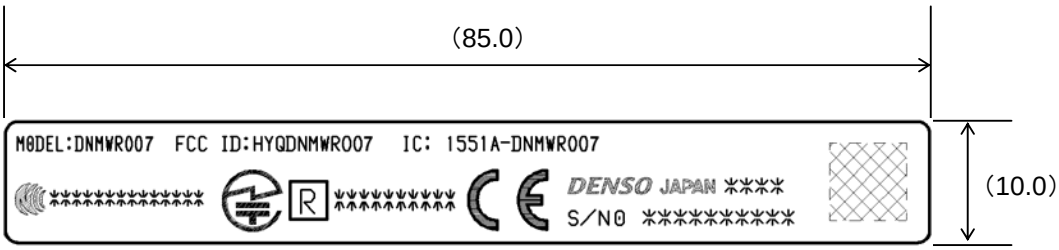
Marking layout and location (Model: DNMWR007)



Unit: mm

Fig. Marking Layout

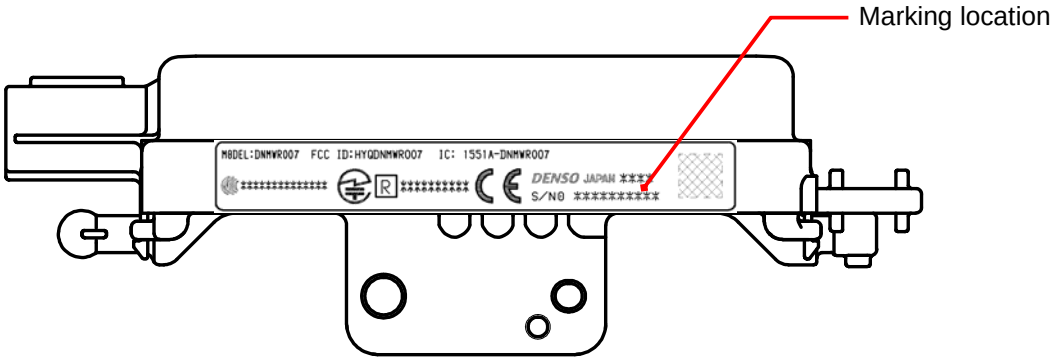


Fig. Marking Location

Note:
Marking layout, size and other indications maybe changed.
Due to design constrains*, the space available for marking is limited to the position as illustrated above.

* The radio wave is emitted from the front surface. Existence of any object on the surface may affect equipment's RF performance, and no labels can be attached.
Heat release fins are made on the back side, and there is no flat surface to attach labels.
