1. Overview

1.1 Scope of application

▪

This requirement applies to the selection, testing and acceptance of G580HPRO antennas.

1.2 Project basic information

Antenna name:	<u>G580HPRO</u>
Antenna frequency:	2402-2484Mhz
Antenna material:	Srapnel / ceramic (common D058)

2. Technical index requirements

2.1 Introduction of test items and equipment

inventory	test item	equipment
Active test	TRP,TIS	Integrated tester, microwave darkroom

2.2 Active Reporting

2.2.1 Test instructions

Test tools: Agilent8960 instrument, R & SCMW500, full wave far field ETS dark room, high precision positioning system and its controller and computer with automatic test program

Test environment: temperature $22^{\circ}\text{C} \pm 3^{\circ}\text{C}$, humidity $50\% \pm 15\%$

Test method: DUT is fixed in the center of the turntable with H plane, on the same horizontal line as the center of the horn antenna.

The positioning system enables the DUT to rotate in the whole sphere to satisfy the high-precision 3 D positioning. Each RF instrument and turntable controller communicate with the PC with automatic test software through the GPIB interface.

2.2.2 Antenna active parameters

frequency range	CH	TRP (db)	TIS (dbm)
WIFI-11B	1	13.32	-82.15
	6	12.95	-81.65
	13	13.46	-82.41

Match not modified

2.2.3 passive antenna parameters

2.2.4 Antenna environment treatment

As shown in the figure, the metal frame radium carving, and add conductive sponge and mainboard grounding

As shown in the figure, the radium carving in the metal frame is added, and the conductive sponge and the display screen are grounded. The thickness of the conductive sponge is subject to full contact

2.2.5 Antenna passive parameters

Freq (main antenna efficiency)	Effi (%)	Gain (dbi)
2400MHZ	26	1.2
2420MHZ	30	1.4
2440MHZ	36	1.5
2460MHZ	34	1.4
2480MHZ	32	1.2
2500MHZ	28	1.0

2.2.6 Direction-2.4G- -WIFI

3. Structural drawings

shra^p_{nel}

Technical requirements: 1. Material: Copper-Nickel-Zinc Alloy, thickness 0.20mm; 2. The size with * and the size with tolerance are the key control sizes, and other sizes are controlled according to the tolerance of the detail column; 3. The raw edge is not more than 1/4 of the material thickness, and the difference between the knife edge and the joint is not more than 0.1mm; 4. Clean surface, no oil, dirt, etc.; 5. No indentation, fracture, deformation and other bad; 6. The product needs to undergo 48-hour salt spray test. 7. Products meet ROHS standards and reliability test requirements.
