DISCLAIMER OF WARRANTIES

THE CONTENTS OF THIS MANUAL ARE PROVIDED "AS IS". EXCEPT AS REQUIRED BY APPLICABLE LAWS, NO WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE MADE IN RELATION TO THE ACCURACY, RELIABILITY OR CONTENTS OF THIS MANUAL.

LIMITATIONS OF LIABILITY

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL HUAWEI TECHNOLOGIES CO., LTD. BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, OR LOST PROFITS, BUSINESS, REVENUE, DATA, GOODWILL OR ANTICIPATED SAVINGS.

THE MAXIMUM LIABILITY (THIS LIMITATION SHALL NOT APPLY TO LIABILITY FOR PERSONAL INJURY TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH A LIMITATION) OF HUAWEI TECHNOLOGIES CO., LTD. ARISING FROM THE USE OF THE PRODUCT DESCRIBED IN THIS DOCUMENT SHALL BE LIMITED TO THE AMOUNT PAID BY CUSTOMERS FOR THE PURCHASE OF THIS PRODUCT.

Keys and Functions

Figures in this guide are provided for your reference only.

	• Press and hold to power on your phone. • Press and hold to display the options menu from where you can power off the phone and perform some shortcut operations. • Press to lock the screen when your phone is active. • Press and hold for over 10 seconds to forcibly restart the phone.
	• Touch to return to the previous screen or exit the currently running application. • Touch to hide the keyboard.
	Touch to open the menu on an active screen.
	• Touch to return to the Home screen. • Touch and hold to view the list of recently used applications.

Installing SIM and microSD Cards

Install the USIM card or microSD card as shown in the following diagrams. Power off your phone before installation.

1 Removing battery cover

❷ Install a SIM/USIM card

Standard USIM card dimensions:
25mmx15mmx0.76mm(DxWxH)

- Your phone supports only standard USIM cards. Using a non-standard USIM card may cause damage to your phone.
- Do not install or remove a USIM card when your phone is powered on.

❸ Install a microSD card

Charging the Battery

Your mobile phone has an internal rechargeable battery. Do not attempt to open the battery cover and replace the battery yourself. To have the battery replaced, contact Huawei or an authorized service provider.

Use the charger provided with your phone. If the phone is not used for a long time or the battery charge is fully depleted, the phone may not be able to power on immediately after the charger is plugged in. Please charge the phone for a while before powering it on.

If your phone is powered on, the charging icon is displayed in the notification bar while the battery is charging. When the icon changes to , the battery is fully charged.

Use only the following listed AC Adapters/Power Supplies: HUAWEI: HW-050100A3W, HW-050100B3W, HW-050100E3W, HW-050100U3W

Powering Your Phone On or Off

- When your phone is off, press and hold ⏻ to power it on.
- When your phone is on, press and hold ⏻ to display the options menu, and touch **Power off** to power your phone off.

If your phone malfunctions or cannot be properly powered off, press and hold ⏻ for at least 10 seconds to forcibly restart the phone.

Finding the User Guide

For more information about how to use your phone, please read the user guide. You can find the user guide by visiting the Web site: www.huaweidevice.com/worldwide.

Operating Environment

- The device complies with the RF specifications when the device is used near your ear or at a distance of 1.0 cm from your body. Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep your device 1.0 cm away from your body to meet the requirement earlier mentioned.
- Keep the ambient temperature between -10 °C and 40 °C while the device is being charged. Keep the ambient temperature between -10 °C to 40 °C for using the device powered by a battery.

Certification Information (SAR)

This device meets guidelines for exposure to radio waves.

Your device is a low-power radio transmitter and receiver. As recommended by international guidelines, the device is designed not to exceed the limits for exposure to radio waves. These guidelines were developed by the independent scientific organization International Commission on Non-Ionizing Radiation Protection (ICNIRP) and include safety measures designed to ensure safety for all users, regardless of age and health.

The Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a device. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level of the device when being operated can be well below the value. This is because the device is designed to use the minimum power required to reach the network.

The SAR limit adopted by USA and Canada is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The Highest SAR value reported to the FCC and IC for this device type when tested for use at the ear is 0.511W/kg, when properly worn on body is 0.997 W/kg, and when using Wi-Fi hotspot function is 1.280 W/kg.

The SAR limit also adopted by Europe is 2.0 W/kg averaged over 10 grams of tissue. The highest SAR value for this device type when tested at the ear is 0.526 W/kg, and when properly worn on the body is 0.672 W/kg.
