

Remote control instructions

1. Transmitter button description

Key Function

ON/OFF: used to turn on or off the fan

Speed -: Used to reduce the fan speed, short press: reduce to the minimum speed according to a fixed ratio. Long press: reduce to the minimum speed at a rate of 1%

Speed+: Used to increase the fan speed, short press: increase to the maximum speed according to a fixed ratio. Long press: increase to the maximum speed at a rate of 1%

Transmitting indicator: when you press any button, it is always on

Charging indicator: the red light is always on when charging, the green light is always on when fully charged

Speed mode:

Fixed speed ratio: 10%, 15%, 20%, 25%, 50%, 75%, 100%

Default speed ratio: 25% (initial speed at startup)

2. Pairing method of remote control and receiver

2.1: The transmitter has a built-in battery, without any settings.

2.2.1 Remote control pairing: After the receiver is connected to the battery, press the power switch, and the green indicator light of the receiver is always on. Use the card pin to insert from the small hole of the shell, after a short press, the green indicator light will turn on. After the green indicator light is off, short press any button of the transmitter. At this time, the blue indicator light of the receiver will flash three times, and the green indicator light will be turned on. At this time, the remote control is successfully paired.

2.2.2 Unpairing the remote control: When the power supply of the receiver is turned on, use the card pin to insert from the small card of the housing, press and hold for 2S-3S, and after the orange indicator flashes three times, cancel the currently paired transmitter.

FCC Statement

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Note : This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
