External Labeling Request

To whom it may concern,

Based on the guidance of KDB 784784 D01, Section 3, Tag-N-Trac Inc., has determined that external labeling on their product would not be practical based on the use case of the product:

- 1) The product is used outdoors and in shipping environments and will be subject to environmental degradation; over time any external labeling will be worn away.
- 2) The product label is completely utilized on the front to contain shipping information as needed; and the back of the product is completely covered in an adhesive so that the tracker can be placed on a shipping package.
- 3) The product is used by shippers and sold in bulk, and an external label on the product packaging and manual will provide sufficient regulatory notice to end users who are using this product to track shipments.

The labeling of the product on the bulk packaging is pictured below:

In addition, the labeling disclosure may also be found in the manual as pictured below:

Tag-N-Trac Inc.

PRODUCT NAME: Smart Sense Label

PRODUCT MODEL: SLB1

INPUT: 3V Battery Power Max 12mA

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received,
including interference that may cause undesired operation

FCC ID: 2A24I-V09G17J15

Sincerely,
