

Figure 1 displays 16 scatter plots arranged in a 4x4 grid, showing the relationship between various variables (X-axis) and the number of children (Y-axis). Each plot includes a regression line and a p-value.

- Plot 1: Age** (X-axis: Age, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 2: Sex** (X-axis: Sex, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 3: Education** (X-axis: Education, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 4: Income** (X-axis: Income, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 5: Religion** (X-axis: Religion, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 6: Ethnicity** (X-axis: Ethnicity, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 7: Marital status** (X-axis: Marital status, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 8: Employment** (X-axis: Employment, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 9: Health** (X-axis: Health, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 10: Social capital** (X-axis: Social capital, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 11: Parental involvement** (X-axis: Parental involvement, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 12: Parental stress** (X-axis: Parental stress, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 13: Parental mental health** (X-axis: Parental mental health, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 14: Parental substance use** (X-axis: Parental substance use, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 15: Parental delinquency** (X-axis: Parental delinquency, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
- Plot 16: Parental criminality** (X-axis: Parental criminality, Y-axis: Number of children). Regression line: $y = 0.001x - 0.001$, $p = 0.999$.
