What's Included in the box:

SPACETALK Adventurer

1 x Screen Protector

1 x USB-A to USB-C cable

1 x Charging Dock

1 x Quickstart Guide
1 x Warranty Card

Model: SP-CD3

Before you start

Your Spacetalk Adventurer will require an activated nano-SIM card from a provider operating on a 4G mobile network. For a list of recommended SIM providers or support, please visit our website.

A parent or guardian will be required to download the Spacetalk app onto their iOS® or Android™ smartphone.

Spacetalk app

The Spacetalk app gives you control of your child's Spacetalk from your own smartphone (or other smart device.) You manage their contacts, a GPS tracker ensures you always know where they are and an SOS button means you're in immediately reach if they need help. And that's just the start.

Download on the App Store

GET IT ON Google Play

Charging

Connect the charging dock to a USB power source (like a phone charger or computer) with the USB cable provided. Ensure the LED on the dock is glowing green before placing your Spacetalk on the charging dock.

Charging | Fully Charged

The LED on the dock will glow red and the screen will illuminate to indicate your Spacetalk has begun charging. While charging, it is normal for the indicator light to flash momentarily from red to green and then back to red. When the LED changes to green, your watch is fully charged.

We recommend recharging your Spacetalk Adventurer every night, just as you would any smartphone.

Meet your Spacetalk

Let's have a closer look

OLED Display
Bright, energy efficient display

Microphone
Do not attempt to insert objects or obstruct this area

IP67 Water Resistant
Splash proof and dust resistant

5MP Camera
Capture and share memories

Heart Rate Monitor
Accurately track daily fitness activity

Detachable Straps
Easily change-able band straps

Power button

The power button (located on the rear of the watch) can be held down for approximately 3 seconds to power Spacetalk.

Powering off

While powered on, hold down the rear power button to prompt the wearer with options to turn off power or restart.

Spacetalk will automatically dim the display when not in use to optimize the battery life. Simply double tap on the display to wake Spacetalk up.

Insert your SIM

1. Turnover your watch and locate the SIM cover. Carefully lift the cover up from the lip located at the bottom of the cover.

Tip:
Detaching the band straps may provide easier access to removing the SIM Cover.

2. Insert your Nano-SIM into the bottom of the SIM cover, ensuring the gold contacts face upwards.

3. With the SIM firmly in place, re-insert the SIM Cover starting from the top tab, followed by clicking the side tabs into place.

Tip:
To check if your Spacetalk is connected to your service provider's network, check the status bar located at the top of the display. If you are not receiving a signal or your carrier isn't appearing, you may need to contact your service provider.
