Frequently Asked Questions

Q : Why don't these earbuds pair with my phone?

A : Make sure the earbuds are fully charged and powered on.

Make sure your phone's Bluetooth is enabled

If there is no problem with the two points stated above, turn off the powered-on earbuds after 5 continuous and quick clicks.

Put them back into the charging case and close the lip, wait for 1 minute, then open the charging case and reconnect the earbuds to the phone.

Q : Why does the music cut in or out?

A : First, keep the earbuds no more than 15m away from your phone (no obstacles).
If the distance is less than 15m, follow these steps:

1. 1. Put the earbuds back into the case and close the lid, manually click the"
Q79 " on your phone.
2. After 10 seconds, open the charging case and reconnect these earbuds with your phone

Q : How do I reset the headset?

A : Click the headset 5 times quickly when it is powered on (operate both left and right
earphones at the same time), and the pairing information between the headset and
mobile phone will be cleared after restarting.

Q : Why the earbuds still won't be charged or disconnect from the phone after I put them
in the case and close the lid?

A : Make sure the charging case is not in a low battery state.
If the charging case is in a low battery state, the earbuds will neither be charged nor
disconnected.
In this case, please use a type-c charging cable to fully charge the case.

Q : Are these earbuds sweat- and water-resistant?

A : These earbuds are sweatproof and IPX7 waterproof. For electronics, we do not
recommend submerging the earbuds in water. The earphones are not resistant to hot
water, and water vapor will enter the earphones and damage the components.
