8 External Antenna

Receive image signals transmitted from TX end

9 Touch Indicator

Flashing Red Light : Single click for more than 0.5 second
and then release to feed back the
operating action.

Antenna Device

8 The antenna device is professional assembly, users can
not change antenna by yourself.

Insert Memory Card

Wireless Spy Fishing Camera (Receiver) - RX

Attention: Before inserting a new memory card into the device for the first time, it is necessary to complete the formatting first, in order to ensure the normal function use.

Prior to the use of the device, it is required to insert a memory card in order to use the video recording and photo shooting function.

Please hold the edge of Micro SD card and please be aware of the label direction. Insert the card with the connector end toward the slot until the memory card is secured inside the slot.

To remove the card, grab the edge of the card, and pull the card out.

Note:

- Prior to the use of the device, please format the memory card first in order to prevent any system instability due to file not recorded by the present device.
- When the device is under the turn-on state, please do not remove the memory card directly. To remove the memory card, it is suggested that you turn off the device first, in order to prevent damage of the file recorded in the memory card.
- Our company's product does not guarantee the compatibility with all types of Micro SD memory cards.
- In case of any failure of memory card, please contact the memory card manufacturer.
- Please do not place the memory card at humid or moist area, such as contact with high moisture object or corrosive object. Please prevent placement at high temperature area, such as area with direct sunlight exposure or area adjacent to device with heating function.
- Please check the memory card periodically to determine if there is a need to perform formatting or replacement with a new card.

Hardware Connection

Wireless Spy Fishing Camera (Receiver) - RX

Method 1:

Connect to TV Monitor

Hardware Connection

Method 2: Connect to Mobile Phone or Tablet (Presently, only Android system is supported.)

- 1 Confirm that all connection cables are connected completely.
Turn on device power and RX unit and TX unit are able to perform pairing and connection automatically.

- 4 Open the device APP and the monitor screen displays the shooting range of the camera.

- 2 Turn on the power of Device-TX and wait.

Hardware Connection

Method 3: Connect to Mobile Phone or Tablet (Type-Y Male/Female Connection Cable)

When the device is for long-term outdoor use, to prevent insufficient power of the mobile phone or tablet, it is suggested to use a Type-Y Male/Female Connection Cable (optional) for connection to a mobile power source (optional).

- 1 Confirm that all connection cables are connected completely.

Turn on device power and RX unit and TX unit are able to perform pairing and connection automatically.

- 4 Open the device APP and the monitor screen displays the shooting range of the camera.

Hardware Operations

Wireless Spy Fishing Camera - TX

Power On

Touch the power key gently, the indicator is lit up and the device is ready for operations.

Power Off

Long press the power key for 3~5 seconds, the indicator goes off and the device is turned off.

Charging

The device uses 18650 lithium battery for the supply of power. Prior to the use under standby state, please charge the battery completely.

When a transformer is used for charging, please ensure that there is no water on the device surface and it is under a dry environment.

1. Open the waterproof cap on the device.

Please use a power transformer (5V DC/2.0A, not provided as an accessory).

2. Use a conventional USB Type-C transmission cable.

Connect one end to the device Type-C port and the other end to the power transformer in order to perform charging.

To connect the device for the first time, please simply follow the App instructions to complete initial setting.

Once connection is made, for subsequent connections in the future, the device will be connected automatically.

Memory Card Formatting

Wireless Spy Fishing Camera (Receiver) - RX

Attention: Before inserting a new memory card into the device for the first time, it is necessary to complete the formatting first, in order to ensure the normal function use.

After connecting the RX unit to a monitor equipment, power on and connecting the screen to the monitor, user can use two fingers to press the two keys of **1** Fill Light Key and **2** Zoom-in Key simultaneously for approximately 5 seconds. The monitor screen then displays "SD Card Format" and the format is complete.

Safety Regulations

FCC Statement:

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

For product available in the USA/Canada market, only channel 1~11 can be operated.
Selection of other channels is not possible.

This device and it's antennas(s) must not be co-located or operating in conjunction with any other antenna or transmitter except in accordance with FCC multi-transmitter product procedures.

IMPORTANT NOTE:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
