\*Function only available when connected to a mobile device via Bluetooth.

\*\*Function only available when Tracking mode is turned off.

The VX20 includes a Bluetooth remote. By default, the remote is already paired with the video bar. However, follow the below steps if the remote should need to be re-paired or a replacement remote is acquired.

1. Press and hold the pairing button on the VX20's right side for 2 second, the status LED will blink blue, which indicates that the device enters Bluetooth pairing mode.
2. On the Bluetooth remote, press and hold the + buttons until the red LED flashes. The remote will then automatically pair to the video bar.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

We declare that this device is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.
