- Do not place the product in high temperature, high humidity, exposure to the sun, rain and other environments for a long time, otherwise it will seriously affect the normal service life of the product or cause product failure.
- This product has a built-in lithium battery. Do not throw it away or place it in a fire at will to avoid danger.
- The charging voltage of this product is 5v.

#### Overview and instruction for use

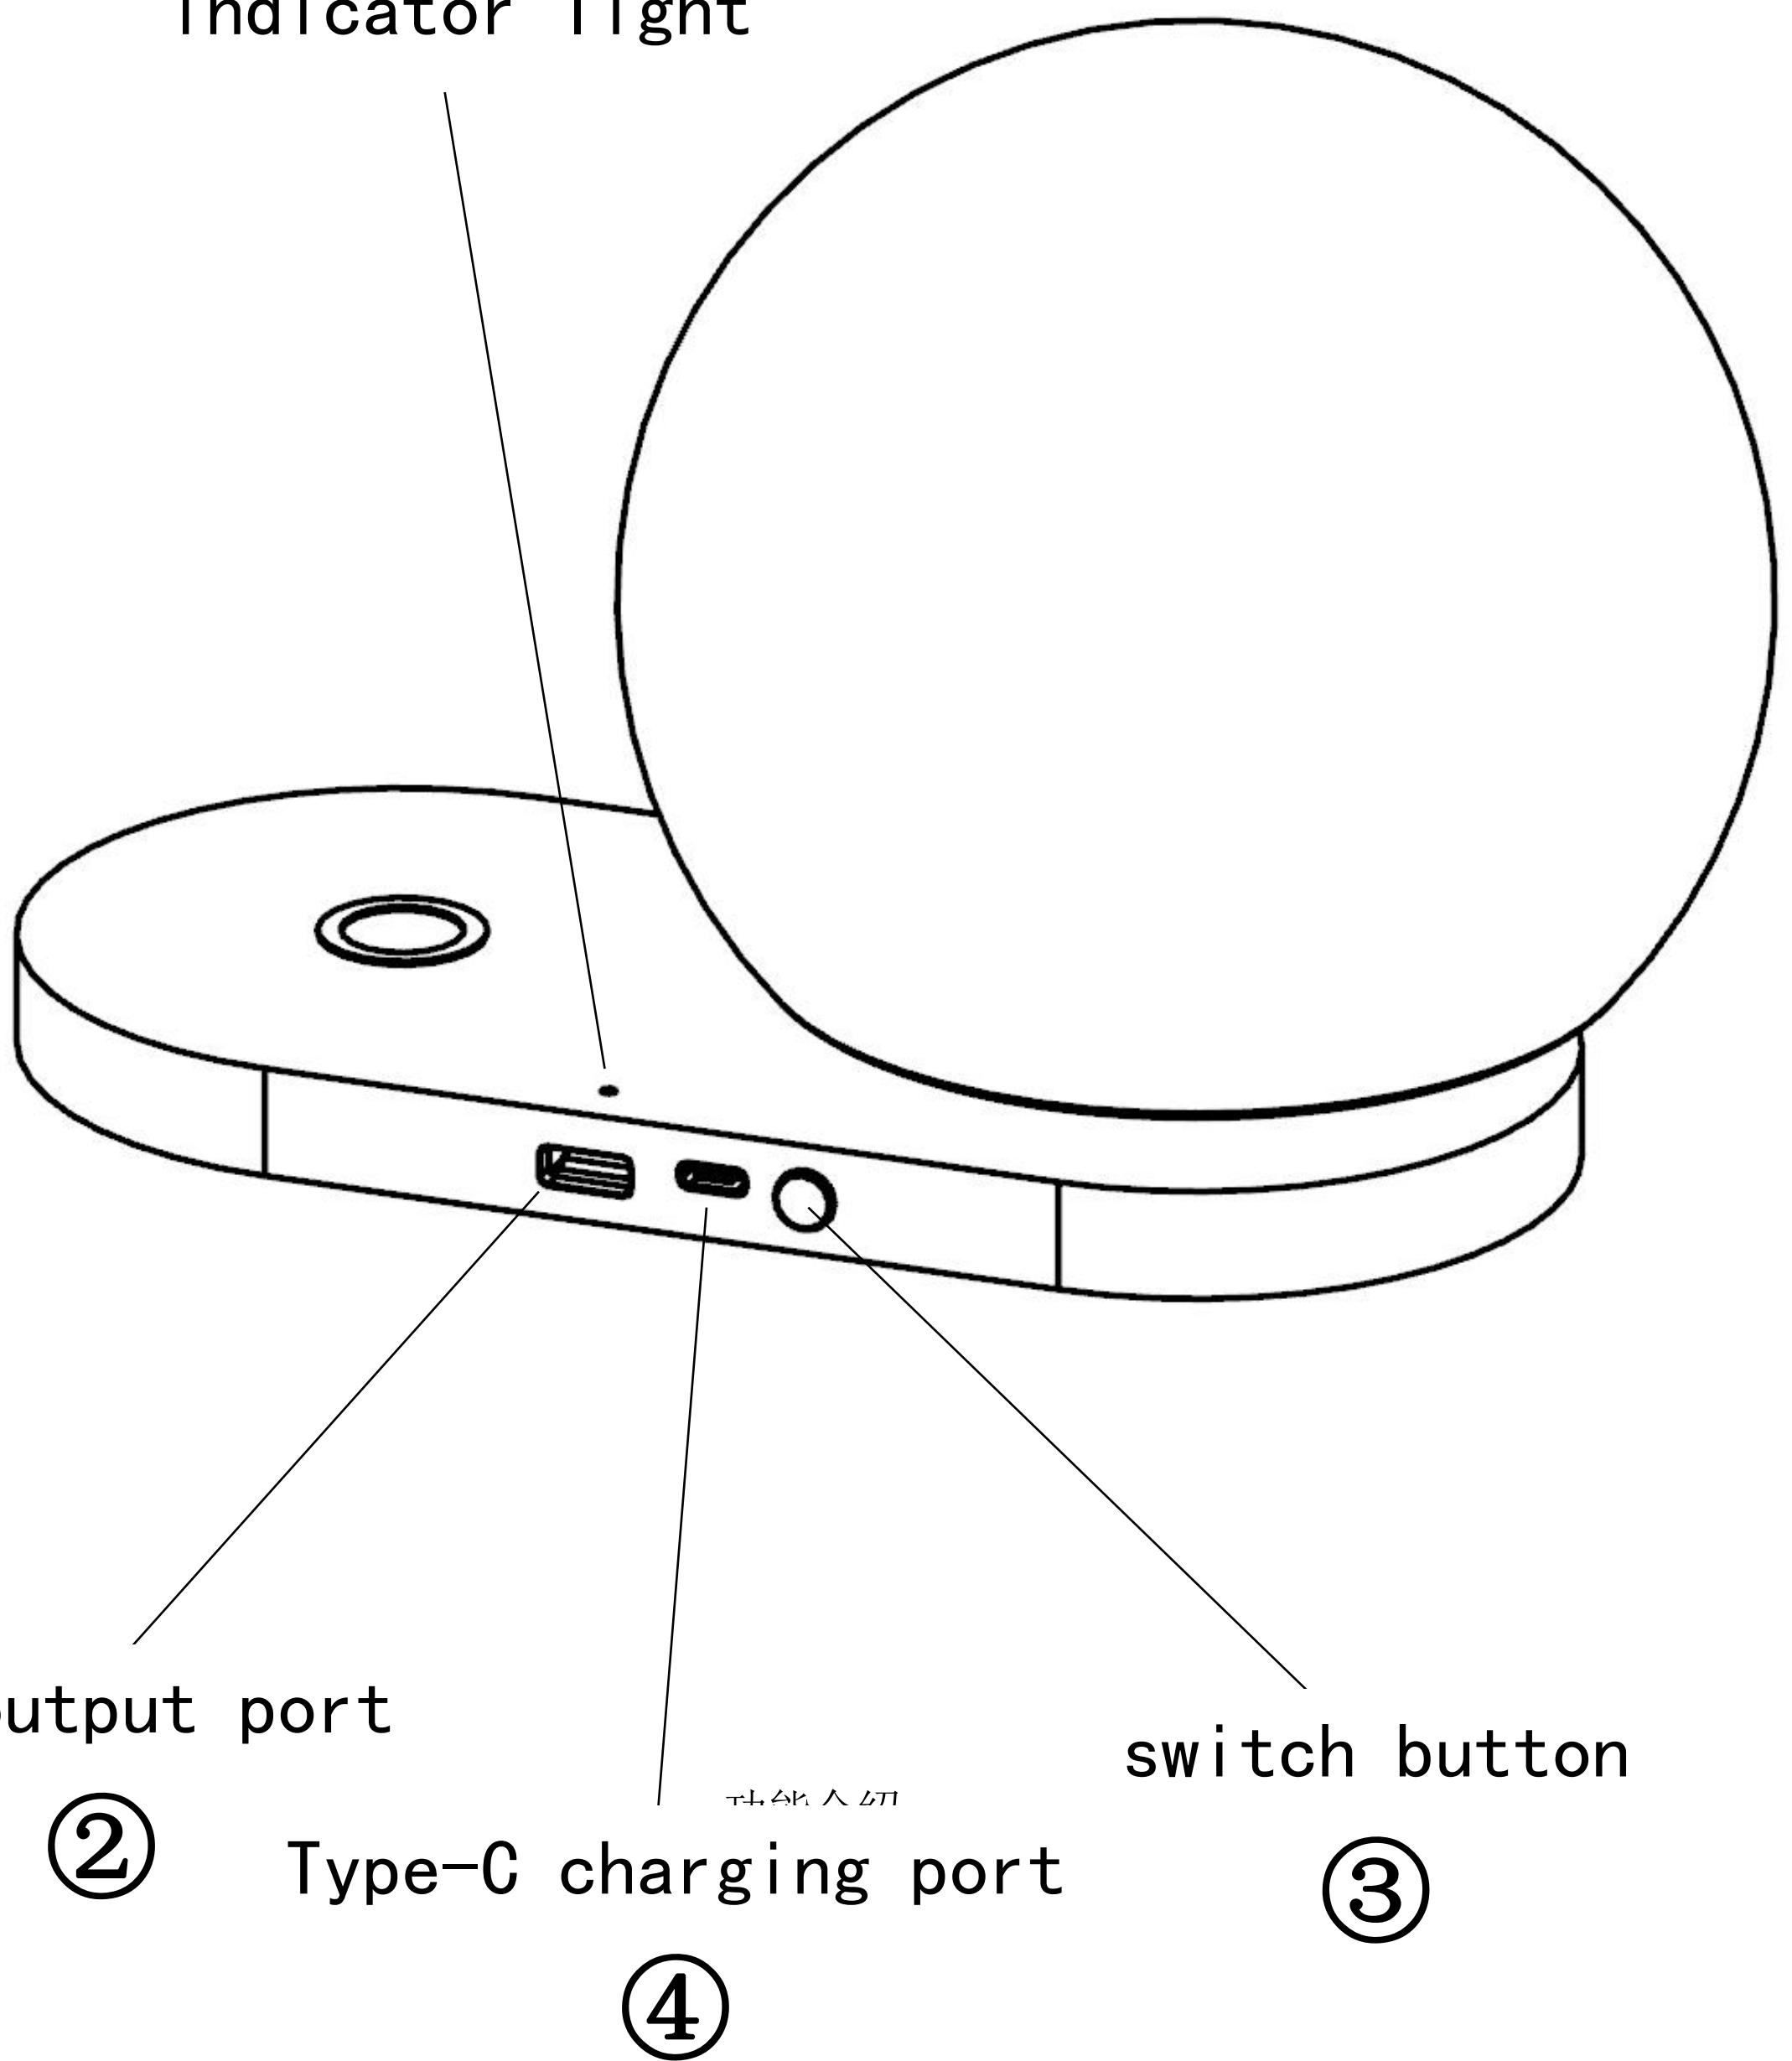

LED luminous area

Wireless charging area

LED light touch switch

①

Long press (③) for 2 seconds to start the machine, and then long press (③) for 2 seconds to shut it down.

## 二、 Wireless charging on / off

There is no type-C plug in, and the built-in battery is used for power supply. Wireless charging function does not work properly without type-C plug in.

When type-C is plugged in, the wireless charging output is normal, and there is no need to press the switch.

The wireless charging of this product can charge smart phones, watches and other devices that meet the Qi wireless charging standard.

## 三、 Wired output

Wired output plug in the data line to automatically identify the charging.

Indicator Description: the green light is on when wireless charging is turned on; The red light is on when USB is output; The green light is always on when the wireless charging is on; When charging, the red light flashes and is always on when full; When USB is discharged, the red light is always on, and when the battery is low, the red light flashes.

## 四、 LED light switch control

Manual control of LED lamp: after the switch is turned on, touch the switch (①) to switch one color every time.

Remote control of LED lamp: compatible with all functions of manual control, such as on-off, adjustable brightness, seven color gradient, seven color jump, etc; When powered on, the default is 16 color gradient effect.

## 五、 Remote control

The remote control of this product needs to pull out the protective plastic sheet under the remote control and can be used.

### Product parameters

Power input	5V2A
Capacity of lithium battery	5000mAh
LED lamp output power	1.5W
Max output parameters of wireless charging	10W
Max output parameters of wired charging	10w

## **FCC Caution.**

### **(1)§ 15.19 Labelling requirements.**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### **§ 15.21 Changes or modification warning**

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### **§ 15.105 Information to the user.**

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### **-RF warning for WPT device:**

-The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15cm surrounding the device and 20 cm above the top surface of the device must be respected.
