"XXXXXX_XXXXXXB": Rear camera video

About WIFI & APP

The app "Ucam" is a free app that allows you to operate this WLAN built-in drive recorder from your smartphone

About WIFI connection

① Download the "Ucam" app
Select [APP] from the main menu and press the [M] switch to display the QR code on the screen. Scan the QR code on your smartphone and download the "Ucam" app.

② WIFI function on
Select [APP] in the menu, and turn on the WIFI function, or press and hold the [▲] button in recording mode to activate the WiFi function.

※The WiFi name (F7N-XXXXXX) and password (initial password: 12345678) will be displayed on the screen after startup. You can check it with the power button.

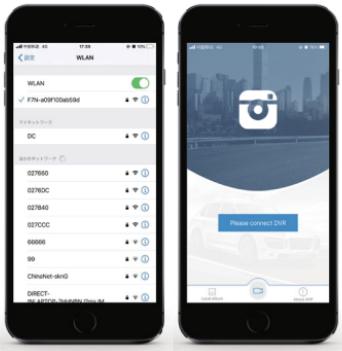

About WIFI & APP

③ Connect your smartphone to WiFi
Select the WIFI name in the WLAN list on your smartphone and enter the password.

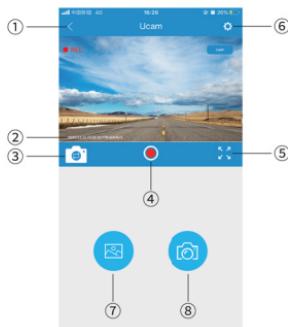

④ Launch the app "Ucam"
When the connection is completed, the running video screen will be displayed automatically on the phone.

Note:

- When connected to WiFi, the dash cam can only operate by phone.
- Press and hold the **【▲】** button to turn off WiFi.

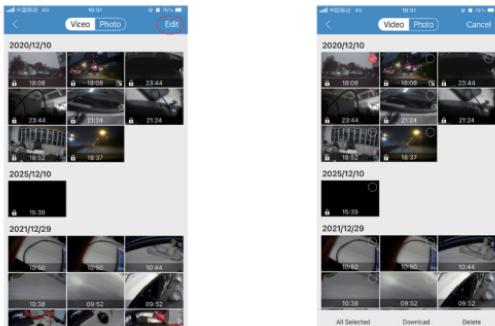

Recording screen of the APP (e.g.IOS)

- ①Return to the front
- ②Video stamp
- ③Switch the display view
- ④Record button
(recording on / off)
- ⑤Full screen display
- ⑥Enter the setting menu
- ⑦Data file
- ⑧Take a photo

About WIFI & APP

Check / play data with APP

You can check and play the data by pressing  on the recording screen to enter the data file.

On the data file screen, press [Edit], select the file you want to download, and press [Download] to download the file and save it to the [local album] which you can find on the interface of APP, then you can download to the smartphone album.

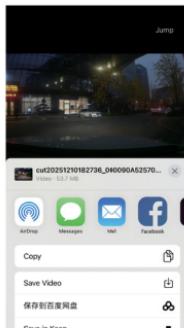

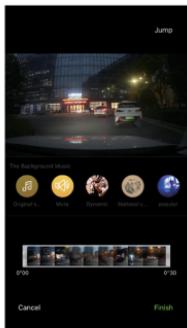

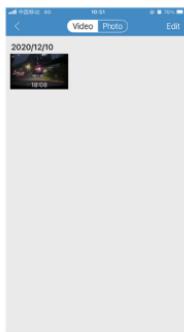

Note: You cannot delete the lock file unless unlocked the file manually.

You can select a local album, play the downloaded data, and view it in conjunction with Google Maps. (Internet connection environment is required.)

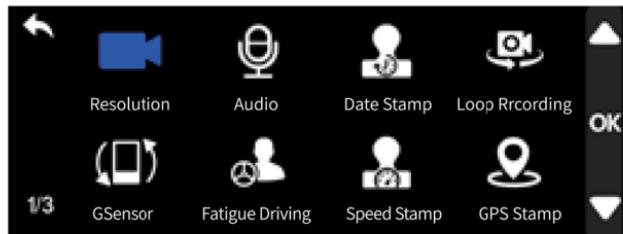

About WIFI & APP

Edit and share with the APP

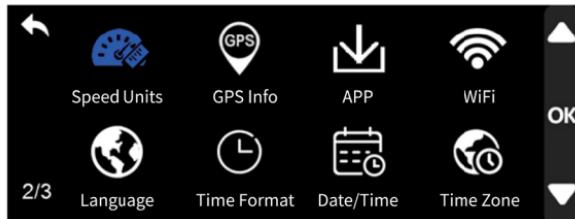

You can enter local albums, edit downloaded files and share them in the APP interface.

※When playing a time-lapse video, you can [slow] it to achieve the normal playback effect.

FAQ

Please check out contents below. If the problem persists after confirmation, please contact your dealer or customer support.

Problem	Reason	Solution
Dash cam can not turn on	● There is a possibility that the cigar adapter is not connected properly.	● Remove the cigar adapter and then reconnect it. Also, make sure that it is securely inserted into the cigar socket.
	● Are you using a branched socket?	● Connecting the cigar adapter to a branched socket may cause fire, or malfunction.
	● Are you using the included cigar adapter?	● Do not use any power source other than the included cigar adapter. It may cause fire, electric shock or malfunction.
	● The temperature environment in which this machine can be used may not be available.	● This dash cam can be used with "-20°C to +70°C".
Malfunction	● The system of this machine may be malfunctioning.	● Press the reset button.
There is no file that should have been recorded	● When the storage area of the microSD card reaches the upper limit, the continuous recording file is overwritten from the oldest file.	● If you want to keep the files, we recommend that you back them up regularly.
May restart	● If you connect or disconnect each cable while the power is on, the main body may restart or turn off.	● Do not connect or disconnect the cable while the power is on. It may cause unexpected operation or malfunction.
Can't record	● Is the microSD card inserted in the main body?	● Make sure that the microSD card is inserted in the main body.
	● Is there a microSD card read error?	● Format the microSD card. If formatting does not help, try another microSD card. Alternatively, insert or remove the microSD card again.
Frequent emergency recordings	● The G sensor sensitivity setting may not be correct.	● Change the setting from "G sensor" in the setting menu.
GPS cannot be received	● Are you driving in a place where GPS signals are difficult to receive?	● It may be difficult to receive GPS signals in tunnels or in valleys of buildings.
	● Isn't this dash cam just started?	● It may be difficult to receive GPS signal immediately after starting this unit. Check again after a while.
	● Isn't it an in-vehicle environment where the built-in GPS cannot be received?	● Depending on the model, GPS may be difficult to receive. ● Purchase an optional GPS unit.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
