**Subject: Pre-Approval Guidance of *SENSAiO***

**Applicant: *EDGE TECHNOLOGIES SAS***

**Product (PMN): *SENSAiO***

**Model (HVIN): *SENSA915A***

**Host (HMN) : *SENSA.VALV***

**FCC ID: *2A2T5-SENSA915A***

**IC ID: *29177-SENSA915A***

To whom it may concern:

The SENS*AiO* product is an electronic device consisting of two electronic modules with a force feedback system and a push-in coupling system for mechanical and electrical coupling, supporting a mother electronic assembly called the "electronic cartridge" with a removable D-Cell battery and a suitable integrated antenna.

The electronics cartridge can only be connected to the SENS*AiO* base sensor module with dedicated daughter connectors with interlocking mechanism. Due to the patented interlocking design, it is impossible to access the electronics without modifying the module.

This module is only intended for and can only be incorporated into SENS*A*.XXXX type products manufactured by EDGE TECHNOLOGIES, which will be subject to Class 2 permissive change procedures for future models (e.g. SENS*A*.PRES and SENS*A*.TEMP).

This module cannot be sold separately.

Please refer to user instruction for further information.

If you have any questions, please do not hesitate to contact us.

Regards,

*Thomas GUILLET*
