There are two models of the ZIBRIO Scale product:

- "Stability Pro Scale" to be used in clinical settings
- "Stability Home Scale" to be used in home settings.

The main circuit board has no differences between the models, including no differences in RF transmitter or reception characteristics.

Distinguishing features are described below for the two models.

ZIBRIO Stability Pro Scale

The ZIBRIO Pro Scale can be distinguished by the glass platform paint color of black.

ZIBRIO Stability Home Scale

The ZIBRIO SmartScale can be distinguished by the glass platform paint color of white, as well as having colored LED lighting underneath the glass platform providing status indication after the balance test.

A handwritten signature in black ink, appearing to read "Kristi Bartlett".
