Instructions for perpetual calendar clock function
The clock will display by default after power on:
Time: 12:00
Date: 2021.01.01

Key function

- ① ⏸ Screen out sleep key
- ② ⏴ Function adjustment setting key
- ③ ⏴ Up key, am / PM switch
- ④ ⏵ Down button, celsius / fahrenheit temperature switch
- ⑤ ☀ Screen brightness adjustment key

Time/Date setting
Short press the setting key to set the time and date, etc. Short press to select the setting objects in turn, short press or long press the up and down keys to adjust (short press plus and minus 1, long press for 3 seconds, continuous plus and minus). The sequence of setting objects is: hour, minute, month, day, year, alarm clock 1 o'clock, alarm clock 1 minute, alarm clock 2 o'clock, alarm clock 2 minutes, exit setting, no operation default 15 seconds to exit setting (short press the screen brightness adjustment button to quickly exit settings).

12/24 hour clock, Celsius/Fahrenheit setting
In the non-setting state, short press the up button to switch between 12/24 hour format. The default is 24 hour format. When switching to 12 hour format, the AM/PM logo in the upper left corner indicates morning and afternoon respectively. Press the key shortly to switch between Fahrenheit and Celsius. The default is Celsius.

Alarm switch setting and display
Long press the off-screen sleep button for 3 seconds to turn on and off the alarm clock 1, long press the function adjustment and switch setting button for 3 seconds to turn on and off the alarm clock 2. The default alarm is off (the alarm icon is not displayed), and the alarm will not sound when the previous set alarm time point is reached. Alarm, when the alarm 1/alarm 2 icon is turned on, the alarm will continue to sound when the set alarm time point is reached, and at this time, press any key to stop the alarm.

Screen brightness adjustment and LOGO light switch
Short press the screen brightness adjustment key to realize the first, second, and third screen brightness adjustment in sequence, and press and hold the LOGO light for 3 seconds to turn on/off.

Wireless charging
Please match the QC2.0/QC3.0/PD adapter for power supply. After power on, the red power indicator flashes on. When the phone is placed in the wireless charging area and enters wireless charging, the green charging indicator flashes on, indicating that the phone is being charged. The USB interface can also be wired to charge the mobile phone (USB only charges 5V/1A).

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
