(2) Please check if you have used the QC3.0 version car charger. (3) Please connect the power supply with the original cable before use. (4) Please check if the thickness of the phone case does not exceed 5 millimeters. Please ensure that there are no metal materials, magnetic objects, credit cards or popular boxes on the back of the phone between the phone and the phone case.</p>	Product name	Input	Magnetic wireless car charger	5V=2A 9V=2A	Product size	Output	65*65*32mm	15W(MAX)	Packing size	Effective distance for wireless charging	84*69*71mm	≤4mm	Net weight/Gross weight	Convert efficiency	99.5g/160g	60%-80%	Material	Operation frequency	ABS+PC+Stainless Steel	110-205KHz	<p>My phone is compatible with wireless charging, why can't it be charged wirelessly?</p> <p>Ensure that the adapter you are using is working properly and that the charging cable is functioning properly. Then try restarting the phone.</p> <p>Why can't it be charged quickly or why can't it be charged?</p> <p>Please use QC3.0 or PD speedy adaptor for fast charging.</p>  <p>Car charger adaptor (not included)</p> <p>FCC Warning Statement</p> <p>Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -- Reorient or relocate the receiving antenna. -- Increase the separation between the equipment and receiver. -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -- Consult the dealer or an experienced radio/TV technician for help.</p> <p>FCC Radiation Exposure Statement</p> <p>The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.</p> <p>This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: (1) This device may not cause harmful interference. (2) This device must accept any interference received, including interference that may cause undesired operation.</p> <p>CE FC RoHS  </p> <p>Made in China</p>
Mode	LED indicator																																	
Power ON	Ice blue light breathes once & switches to standby mode																																	
Standby	Ice blue light is always ON																																	
Unit charging	Light is OFF																																	
Full charge	Ice blue light is always ON																																	
Detecting foreign objects & protecting status	Ice blue light keeps flashing for 5 times & switches to standby mode. (light on for 0.5 seconds & light off for 0.5 seconds)																																	
Product name	Input																																	
Magnetic wireless car charger	5V=2A 9V=2A																																	
Product size	Output																																	
65*65*32mm	15W(MAX)																																	
Packing size	Effective distance for wireless charging																																	
84*69*71mm	≤4mm																																	
Net weight/Gross weight	Convert efficiency																																	
99.5g/160g	60%-80%																																	
Material	Operation frequency																																	
ABS+PC+Stainless Steel	110-205KHz
