

Below is a scheme of the eTag label as it will be placed onto every eTag.

Contains:

1. A 'Segoma' label.
2. The model number for matching the FCC ID.
3. The FCC ID allocated to this model.
4. A serial number in writing and as a QR code.

Comments:

- The phrases 'Model: eTag6.0' and 'FCC ID:2A34XETAG6-0' shall be 6 points in size.
- Other parts of the label – i.e the '*eTag*' label, the Serial number and the QR code shall be as large as the label allows them to be.
- The Model and FCC ID will match the eTag model on which they are placed.
- The Serial number and QR code will change between eTags as they are unique to a single eTag.
