1. Press the button 4 times.  
2. Wait for the beeps, then immediately  
Press & hold the button for 8 seconds.  
**Power off/Disable:** Press 5 times quickly.

#### Charging

Place the Boomtag Car Charger into your car's cigarette lighter port. The LED will turn on and you'll hear a beep, indicating that it is charging and active.

To check the battery status, open Apple's Find My or Android Find Hub app, which will display the battery level. While connected to the car's charging port, there's no need to worry about the battery, as it charges continuously.

#### Tracking

The charger can also be used as a regular tracker for other belongings simply remove it from the car and place it in your bag or elsewhere. It can track for up to 2 months without needing to be plugged back into the car charging port.

This device works with Apple or Android, not both at once. Once linked to a device, it will only work with that system. See the Apple Find My app or Android Find Hub network for family group setup.

#### Safety Information and Product Care

Please read the following instructions before using the charging device for the first time:

Connect the charging device to a suitable power source that complies with the voltage input parameters. Do not attempt to open the charging device, as you might damage it.

While using the charging device, keep it away from heat sources (fire) and humidity (water and other liquids).

Keep it out of reach of children.

Do not leave the charging device in contact with flammable materials.

Do not turn on the car if the charging device is connected to the cigarette lighter socket. Prevent the charging device from receiving a power surge from the car ignition.

Disconnect the charging device from the car cigarette lighter socket when not in use.

Do not leave the charging device connected after turning off the car engine.

Do not use the charging device if you notice any visible defects.

If the charging device has USB ports, we recommend using the original USB cable of your mobile device for charging.

Do not disassemble or modify the charging device. These actions will void the warranty.

Regularly clean the charging device with a dry cloth. The device must be disconnected when cleaning it.

Avoid damaging the charging device cable. Do not place objects on it.

Do not pull the charging device by the cable to disconnect it. Keep the cable extended when the charging device is connected. Disconnect the device you are charging once it is fully charged. Also, disconnect the charging device from the cigarette lighter socket.

Do not expose the charging device to water. Always keep it in a dry place, away from humidity.

When rolling up the cable, do not bend the section where the cable connects to the charging device too sharply.

Avoid dropping or hitting the charging device, as it may be damaged.

##### Note

The features and functions described in this manual are based on tests conducted by the factory lab. It is the user's responsibility to inspect and verify the product after purchase. Our factory is not responsible and will not be held liable for any personal injury, economic loss, material damage, or any other damage resulting from misuse, abuse, or improper installation of the product.

This product should not be disposed of with other household waste in the EU. To prevent potential harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources.

To return your used device, please use local return and collection systems or contact the retailer where the product was purchased. They can forward your device to a recycling facility. The recycling of the product: Electronic products not included in the selective sorting process may pose a danger to the environment and human health due to the presence of hazardous substances.

The Declaration of Conformity can be found at: <https://www.boompods.com/product/BOOMTAG>  
Hereby, Boompods declares that the radio equipment type [tracker with Bluetooth] is in compliance with Directive 2014/53/EU. FCC ID: 2A36Q-TCARUN

#### Statement

FCC ID: 2A36Q-TCARUN

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Rearrange or relocate the receiving antenna.  
Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.
