RE: FCC Change in ID

To Whom It May Concern:

We are applying for a Change in ID to

Original FCC ID: T7V1326C2

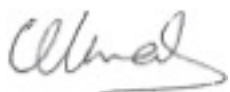

New FCC ID: 2A3CV-BT

The reason for this change is due to FCC KDB 484596, which relates to re-use of test data for a body worn device. Our end device contains this module, however in order to re-use the modular test data we are required to be responsible for the FCC ID for the module.

All necessary testing to support the use of the module in its new host configuration has been carried out. There has been no change in the design, circuitry, or construction, and the original test results continue to be representative of and applicable to the equipment. The test data for this module will be submitted as a part of the application for the end device.

We acknowledge that we are now responsible for compliance of the device that is certified under FCC ID 2A3CV-BT.

Thank you for your attention to this matter.

Yours faithfully,

Leon Marsh, Chief Executive Officer

Inova Design Solutions Ltd
