CEYON TELLINVENTORY CO.,LTD.

Reel Register

To start the program, touch the screen.

I. Registration Device (A)

2. Main Display

This is a main display when using the original barcodes. When you touch the Manu box you wish to proceed, it moves to the next screen accordingly.

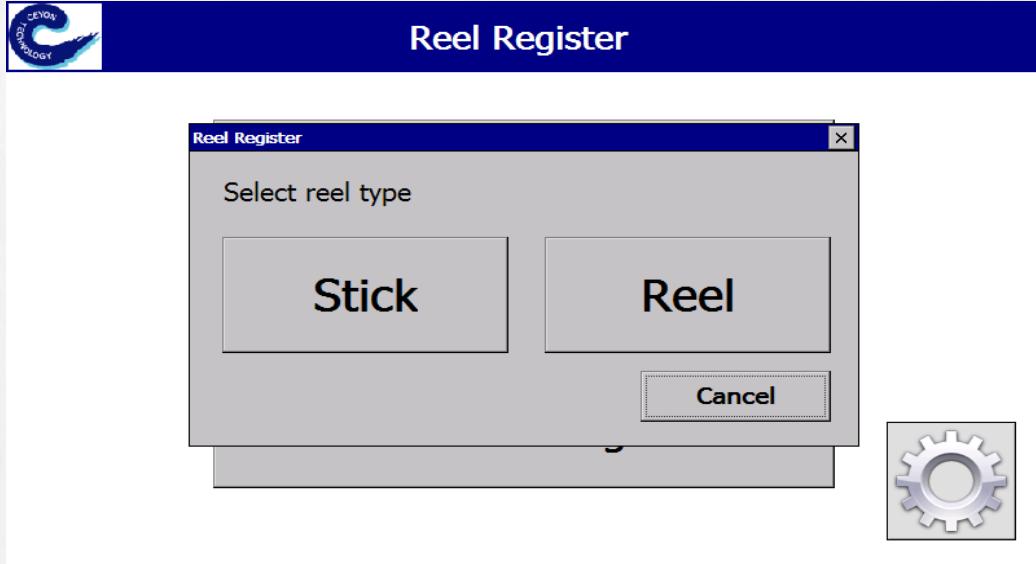

※ Configuration precautions - After minimum set up is completed, you may use without further change.

- Registration : when registering information of stick or reel
- R-Measurement : when measuring reel's remaining amount
- Reuse Tag : when initializing published tags
- Configuration : communication setting of registration device program

I. Registration Device (A)

3. Register

Click on the reel type of your choice and its material registration screen will appear.

- Stick : when material is in stick shape
- Reel : when material is in reel shape
- Cancel : go to main display

I. Registration Device (A)

3.1 Stick Information Registration

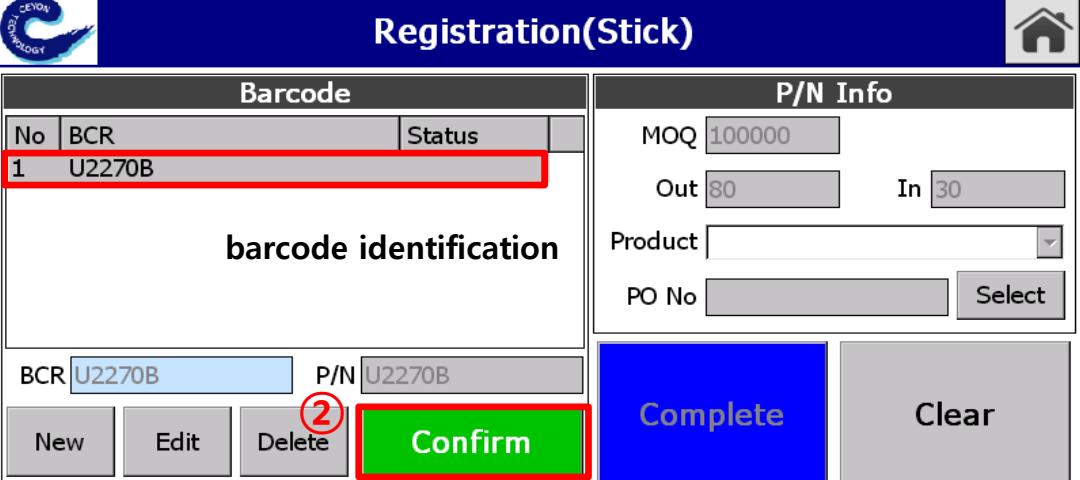

The interface is titled "Registration(Stick)". It has two main sections: "Barcode" and "P/N Info". The "Barcode" section contains a table with columns "No" and "BCR", and a "Status" column. Below this is a text input for "BCR" and a dropdown for "P/N". The "P/N Info" section includes fields for "MOQ" (100000), "Out" (80), "In" (30), "Product" (dropdown), and "PO No" (input). At the bottom are buttons for "New", "Edit", "Delete", "Confirm" (highlighted in green), "Complete" (highlighted in blue), and "Clear". A yellow message box at the bottom left says "Please read the barcode on the reel."

▪ How to register stick information

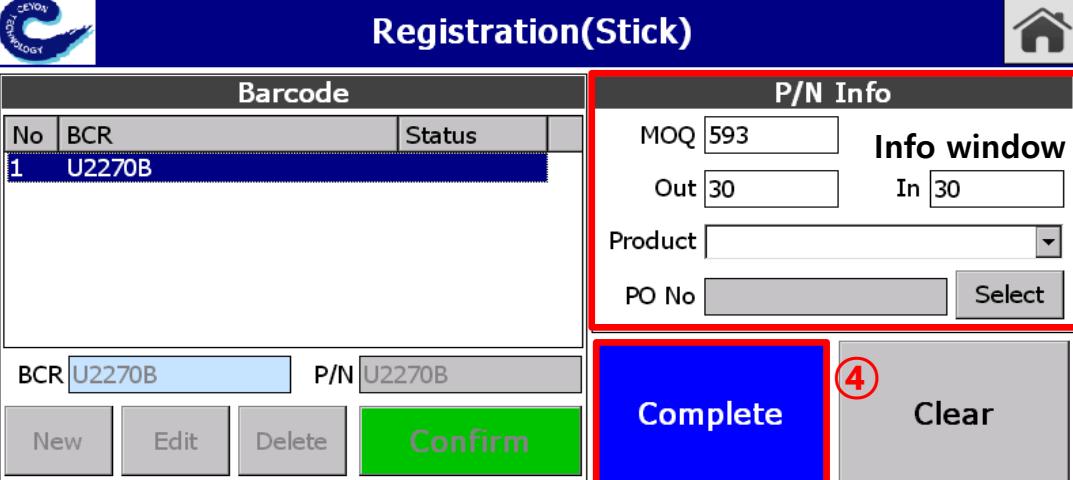

- 1) Plug in an initialized tag into a stick, and put in a registration device.
- 2) After identifying the barcode, its information will be displayed.
 - a. When registering a new barcode
→ After clicking on "Confirm", P/N Info display will be vitalized. Put in MOQ and select product item, and when you click on "Complete", registration is completed.
 - b. When a barcode is already registered
→ It will show as "Registered" on status, and remaining amount entering window will appear. After entering remaining amount, click on "OK" button and the registration is completed.
- 3) When "Remove" message appears, remove the stick and you may measure by inserting the other stick.
- 4) You may go back to the main display by clicking on home button.

I. Registration Device (A)

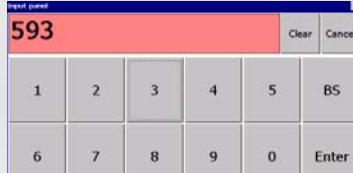

- Stick information registration (example display of a new barcode registration)

Choose the barcode think that Part No.

Please input reel information. If you finish input, press the reset button or press the 'complete' button on the screen

P/N Info input example

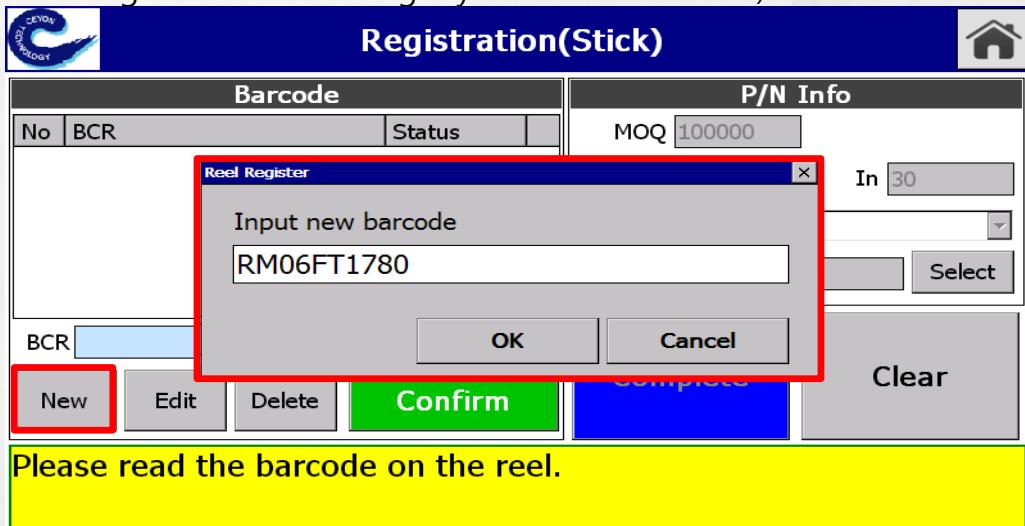

I. Registration Device (A)

3.1.1 Stick Information Registration Exceptions

I. When barcode is damaged and incapable of auto registration

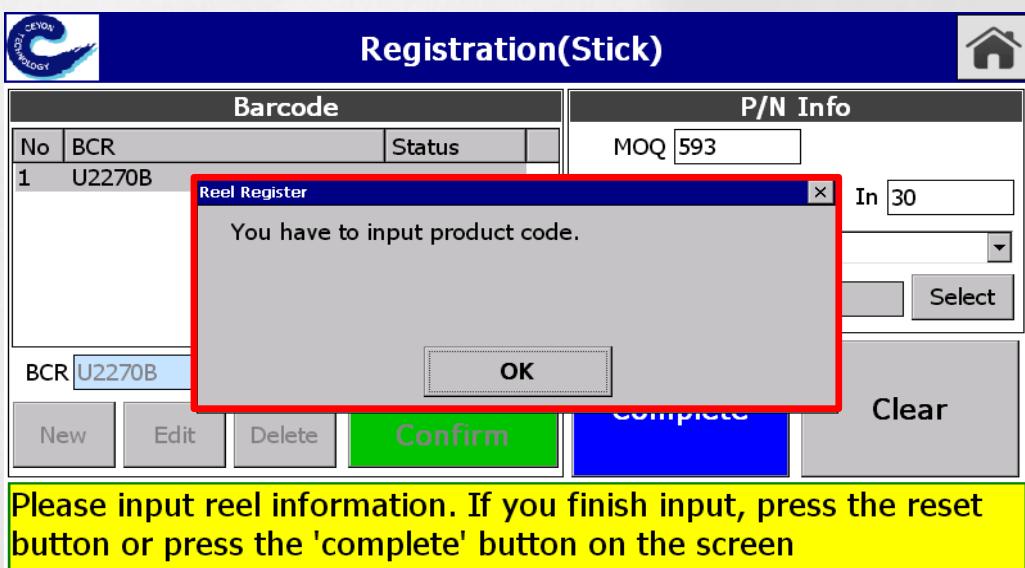

When barcode is not attached

Register by manually entering the barcode information. On registration display, touch on "NEW" for manual input and you may also modify or delete the barcode information. (Re-attaching barcode is highly recommended.)

II. When not all of P/N Info is entered

When manually entering P/N Info, please do not miss any information.

I. Registration Device (A)

3.1.1 Stick Information Registration Exceptions

III. When tag reading is failed

This is a display when it fails to read the tag.

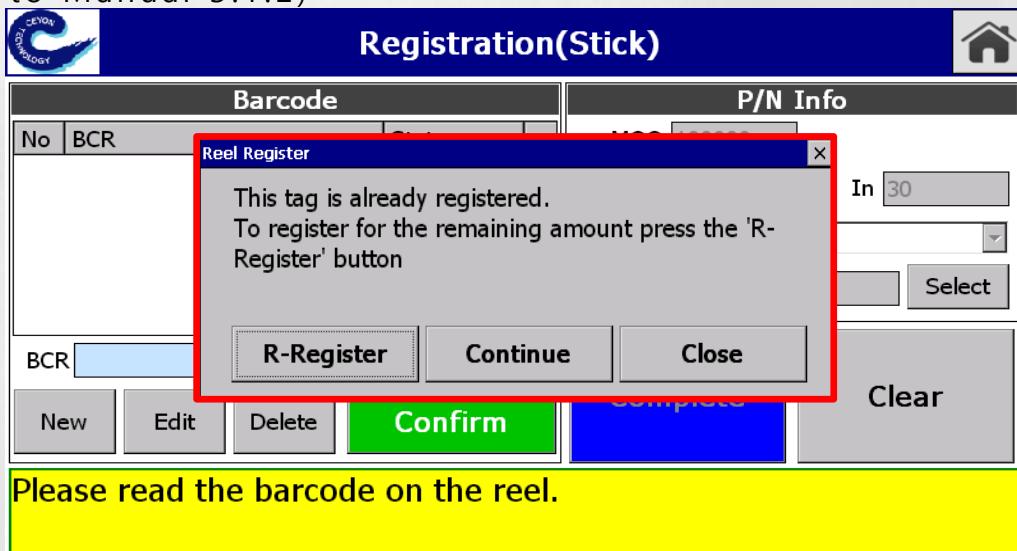

- Remove stick from the registration device and plug back in.
- When the error continues after procedure 1, attach a new tag and try again.

The registration of the Part No.

IV. When a stick with a registered tag is inserted

When you insert a stick with a tag that is already registered, you can modify its residual quantity. Please refer to the next page. (Refer to Manual 3.1.2)

Please read the barcode on the reel.

I. Registration Device (A)

3.1.2 Remaining Amount Modification of Stick

The screenshot shows the 'Registration(Stick)' software interface. At the top, there is a logo for 'CEYON TELLINVENTORY CO.,LTD.' and a 'Barcode' section. Below that is a 'P/N Info' section with a dropdown menu set to 'In 30' and a 'Select' button. A red box highlights a pop-up message: 'This tag is already registered. To register for the remaining amount press the 'R-Register' button'. A red arrow points to the 'R-Register' button. Below the message are 'Continue' and 'Close' buttons. At the bottom, there are buttons for 'New', 'Edit', 'Delete', 'Confirm' (highlighted in green), 'Complete' (highlighted in blue), and 'Clear'. A yellow bar at the bottom says 'Please read the barcode on the reel.'

Input panel

The input panel shows a red text area with the number '593'. To the right are 'Clear' and 'Cancel' buttons. Below the red area is a numeric keypad with digits 1-9, 0, and 'BS', and a 'Enter' button. A green bar at the bottom says 'Please press the 'Enter' button or press the 'complete' button on the screen'.

- **How to modify remaining amount of a stick**
 - 1) Insert a stick with a registered tag into a registration device.
 - 2) When a pop-up message saying " This tag is already registered" appears, click on "R-Register" button.
 - 3) After entering the remaining amount, click on "Enter" and "Ok" in order and it will be updated.

FCC Instructions

FCC Compliance Statement(Part 15.19 (3))

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this devi must accept any interference received, including interference that may cause undesired operation.

FCC Interference Statement(Part 15.105)

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
