

**HUIZHOU KTC TECHNOLOGY CO.,LTD.**

Date (15/11/2021)

Federal Communications Commission  
Equipment Authorization Branch  
7435 Oakland Mills Road  
Columbia, MD 21046

**Modular Approval Request**

**FCC ID:** 2A3MNK-AW7603M1

**The following attestation addresses the requirements to support modular approval:**

| <b>Modular approval requirement</b>                                                                                                                                                                                           | <b>Yes (provide brief statement)</b>                                                                           | <b>No *</b> |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|-------------|
| (a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly                                | Yes (Refer to the external photo)                                                                              |             |
| (b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal                                                                        | Yes (All input to the modules are buffered through microprocessor inputs)                                      |             |
| (c) The module must contain power supply regulation on the module                                                                                                                                                             | Yes (Internal power regulators<br>Refer to the block diagram)                                                  |             |
| (d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b) | Yes (Refer to the external photo)                                                                              |             |
| (e) The module must demonstrate compliance in a stand-alone configuration                                                                                                                                                     | Yes (The EUT was tested in a standalone configuration via a SD extension cable. Refer to the test setup photo) |             |
| (f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)                                                             | Yes (Refer to the labellocation and the user manual)                                                           |             |
| (g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements                                                      | Yes (Refer to the user manual)                                                                                 |             |

| Modular approval requirement                             | Yes (provide brief statement)                             | No * |
|----------------------------------------------------------|-----------------------------------------------------------|------|
| (h) The module must comply with RF exposure requirements | Yes (Refer to the RF exposure statement for more details) |      |

\* Please provide a detailed explanation if the answer is "No."

Sincerely,

Signed: *Leon Deng*
