Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) populated with various electronic components. The components include several integrated circuits (chips) and two large electrolytic capacitors labeled '680 20V H43'. The board is positioned next to a metric ruler for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The board is oriented horizontally, and the ruler is placed vertically to its right.
Solder Board-Component View 8	 A photograph of a silver-colored metal component, likely a heat sink or a mounting plate, positioned next to a metric ruler for scale. The component is rectangular with four mounting holes at the corners. The ruler is placed vertically to its right, showing measurements in millimeters. The component is oriented horizontally, and the ruler is placed vertically to its right.

Solder Board-Component View 9	 A photograph of a small green printed circuit board (PCB) component, labeled 'WTX24X11265506W001/001/002/003/004/005', placed on a blue surface. The component is rectangular with various electronic components soldered onto it, including a central integrated circuit (IC) and several resistors. Two white plastic connectors are attached to the bottom edge. A black ruler with white markings is positioned vertically to the right of the component, showing measurements in millimeters (mm).
Solder Board-Component View 10	 A photograph of the same green PCB component from a different angle, showing the top surface. The component is rectangular with various electronic components soldered onto it, including a central integrated circuit (IC) and several resistors. A black ruler with white markings is positioned vertically to the right of the component, showing measurements in millimeters (mm).
