

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing the conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer and a power supply unit. A power cord connects the power supply to a power strip on the wall. To the right, a large, light-colored wooden table is positioned. A small white device and a black probe are on the table. A power strip is also visible on the wall behind the table.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing the radiation emission test setup. A white, rectangular test object is placed on a black, rectangular table. The table is positioned in front of a large, white, square-patterned electromagnetic interference (EMI) shield. The shield is made of many small, white, square-shaped absorbers. The floor is concrete, and there are yellow and black striped safety markings on the floor.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
