Programming Instructions

Information & Safety warnings

- Protect your User Codes and Master Code.

- Keep your key secure. It is suggested to keep it outside the door, such as in your car.

- Restrict access to your lock's interior assembly and routinely check your settings to ensure they have not been altered without your knowledge.

- This lockset is designed to provide the highest standard of product quality and performance. Care should be taken to ensure a long-lasting finish. When cleaning is required, use a soft, damp cloth. Using lacquer thinner, caustic soaps, abrasive cleaners or polishes could damage the coating and result in tarnishing.

⚠ **IMPORTANT: Do not load batteries until the lock is completely installed.**

Definitions

Master code

The master code can be used to unlock the door in vacation mode. The default master code is usually set by the manufacturer and needs to be changed to a unique code by the property owner or manager before programming.
It is essential to keep the master code confidential to maintain the security of the property.
The property owner/manager should keep this information confidential.
1. Master Code (6 to 8) digits: The default Master Code is 123456. It is required that you change it to a code of your own before programming.
2. User Code (6 to 8) digits: A total of 200 User Codes can be programmed.

Wrong entry limit

After 5 incorrect attempts, the unit will shut down for 5 minutes.

Unlock with fake code

The user can prevent the exposure of the PIN code to strangers by entering random digits before or after the correct PIN code.
