

Star Night Light Projector

User Manual

Basic Safety Instructions

In order to avoid the risk of electric shock, fire or personal injury, please read this manual carefully before using this machine, and keep it for future reference. The Star Night Light Projector could be only used for indoor. Please do not use it outdoor or the projector light may be damaged by rain or water.

If the equipment is damaged, please contact the seller immediately for repair. Please do not disassemble the product by yourself. We are not responsible for any damage caused by the users' failure to disassemble the product. This product is composed of laser and pattern lights, which can project the scene of twinkling stars, a still moon, and floating clouds. (Please do not direct the laser into your eyes, and keep the product away from children.) Before using, please make sure all necessary parts are included in the package.

Star projection light before the first use. For any other questions, please feel free to contact the customer service team.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body
