| <p><b>Conducted Emission<br/>Test Setup</b></p>       |  A photograph of a laboratory setup for conducted emission testing. On the left, a piece of electronic equipment, possibly a spectrum analyzer or a power supply, sits on a white desk. To its right, on a wooden workbench, are a laptop and a desktop monitor, both displaying a color calibration chart with vertical bars of yellow, cyan, magenta, red, and blue. Various cables and a red fire extinguisher are visible on the floor between the desks. |
| <p><b>Radiation Emission<br/>View(Below 1GHz)</b></p> |  A photograph of a radiation emission test chamber. The interior walls are lined with white, square-shaped electromagnetic absorbers. In the center, a white table holds a laptop and a monitor, both displaying color calibration charts. The floor is a smooth, reflective surface. In the foreground, a metal frame with several vertical rods is visible. A green and white striped safety line is marked on the floor.                                  |
