# Safety Instructions

## (Please Read Carefully Before Use)

---

- Please follow the operation steps in the user manual (See page 9) to operate the humidifier correctly at home;
- Keep the plug and power supply away from liquids;
- Please check the device before use for any cracks, chips or damage that may cause leakage of the device. If you find any damage, **DO NOT** use it. Only professional or authorized maintenance personnel can repair the appliance. **DO NOT** replace parts or add other items as replacement parts by yourself;
- **DO NOT** pour out the remaining water in the base without unplugging the power plug, otherwise it will cause the atomizer to burn out;
- **DO NOT** add essential oils directly in the water tank. The humidifier has specific locations where you can add essential oils (See page 10);
- When plugging in any power source, make sure your hands are dry to avoid the risk of electric shock;
- When adding water, please hold the water tank with two hands to prevent the water tank from falling. If the equipment is in working condition, **DO NOT** move the water tank;
- When unplugging the plug, **DO NOT** pull the power cord with your hands to unplug the plug. The disconnected part is prone to short-circuit and leakage, which may cause fire and electric shock.
- **DO NOT** let children clean or maintain the humidifier alone;
- **DO NOT** use this appliance in any kind of inflammable environment. Keep the equipment away from any heat sources (e.g. stoves, ovens, radiators) and avoid direct sunlight.
