Press first time → Press second time →

Steps for Filling Water

1. Remove all packaging and take out the user manual, quick guide & brush in the water tank.
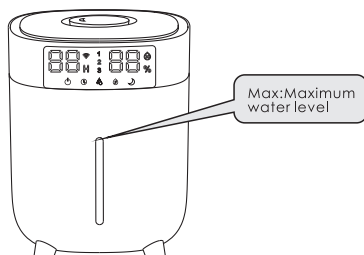

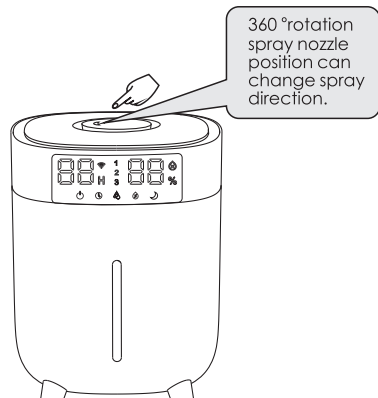

2. The humidifier should be placed on a flat surface.

3. Open the cover and fill in water, or take up the water tank and take it to the tap to add water.
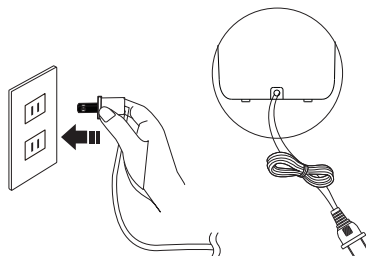

DO NOT fill with hot water

4. Note that water must not exceed the maximum water level.

Max:Maximum water level

5. Put the cover on and plug in the power cord.

360°rotation spray nozzle position can change spray direction.

6. Please insert the wires in a standard way and keep your hands dry.

Precautions

- **DO NOT** add essential oils, water treatment fluids or water filters into the water tank. (Fig.1)
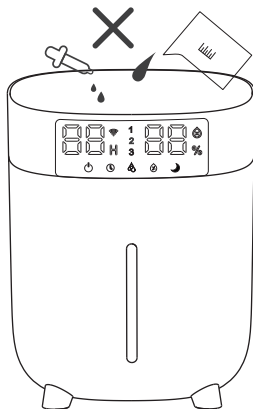

- Make sure that the nozzle cap is back in the water tank, otherwise, the humidifier may not be able to spray mist. (Fig.2)
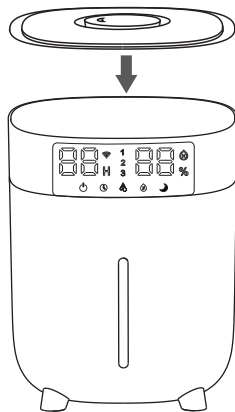

Fig.1

Fig.2

- Please drop the essential oil into the essential oil box which in the half bottom of the mist outlet. (Fig.3)

Cleaning and Maintenance

1. Add appropriate amount of water and clean the machine with a cleaning brush.

2. Wipe the atomizer with a cotton swab dipped in the citric acid solution.

3. Rinse with water and wipe with a soft cloth.

4. Remove the upper cover and nozzle in turn, wash with water, and wipe with a damp soft cloth.

5. Wipe with a soft damp cloth and dry with a dry towel.

Note:
- We do not recommend to use detergent for cleaning, long-term use may cause corrosion of the shell;
- **DO NOT** use hard and sharp devices to touch or hit the atomizing sheet;
- **DO NOT** use a cleaner like a steel ball to clean the water tank, which will scratch the water tank.
