FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The distance between user and device should be no less than 20cm.

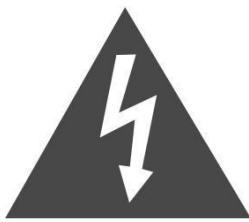

Electric and electronic equipment and included batteries contains materials, components and substances that can be hazardous to your health and the environment, if the waste material (discarded electric and electronic equipment and batteries) is not handled correctly.

Electric and electronic equipment and batteries is marked with the crossed on trash can symbol, seen here. This symbol signifies that electric and electronic equipment and batteries should not be disposed of with other household waste, but should be disposed of separately.

All cities have established collection points, where electric and electronic equipment and batteries can either be submitted free of charge at recycling stations and other collection sites, or be collected from the households. Additional information is available at the technical department of your city.

IMPORTANT SAFETY INSTRUCTIONS

CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN

This symbol indicates that dangerous voltage constituting a risk of electric shock is present within the unit.

This symbol indicates that there are important operating and maintenance instructions in the literature accompanying the unit.

1. Read these instructions carefully.
2. Keep these instructions for future reference.
3. Take careful note of all warnings.
4. Follow all instructions carefully.
5. Do not use the unit near running water.
6. Clean only with a damp dry cloth.
7. Do not block any ventilation openings.
8. Do not install near any heat sources such as radiators, heaters, or other devices that generate heat.
9. If the provided plug does not fit into your A/C outlet, consult an electrician.
10. Protect the power cord from being pulled or stretched.
11. Only use attachments/accessories specified by the manufacturer.
12. Unplug the unit from the A/C mains socket during lightning storms or when unused for long periods of time.
13. Refer all servicing to qualified service personnel. Servicing is required when the unit has been damaged in any way, the power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the unit, the unit has been exposed to rain or moisture, does not operate normally, or has been dropped.
14. To reduce the risk of fire or electric shock, do not expose the unit to rain, moisture, dripping or splashing, and no objects filled with liquids, such as vases, must be placed on the unit.
15. DO NOT overload wall outlets or extension cords beyond their rated capacity as this can cause an electric shock or fire.
16. No naked flame sources, such as lit candles, should be placed on the unit.
17. The ventilation openings should not be blocked by covering them with items such as newspapers, tablecloths, curtains, etc.

BEFORE USING THE UNIT

- As the unit may become warm during operation, always leave sufficient space around the unit for ventilation.
- The voltage supplied to the unit should match the voltage as printed on the rear panel. If you are in any doubt regarding this matter, consult an electrician.
- Choose the installation location of your unit carefully. Avoid placing it in direct sunlight or close to a source of heat. Also avoid locations subject to vibrations and excessive dust, heat, cold or moisture.
- Do not place the unit on another electric device such as a TV.
- Do not open the cabinet as this might result in damage to the circuitry or electrical shock. If any object should get into the unit, contact your dealer or service company.
- When removing the power plug from the wall outlet, always pull directly on the plug, not the power cord.
- To keep the stylus pickup clean, do not touch it, and always replace with the protective cover.
- Do not attempt to clean the unit with chemical solvents as this might damage the finish. Use a clean damp dry cloth.
- Keep this manual in a safe place for future reference

DO NOT MOVE THE UNIT WHILST IT IS IN USE.

During playback, the turntable rotates at high speed.

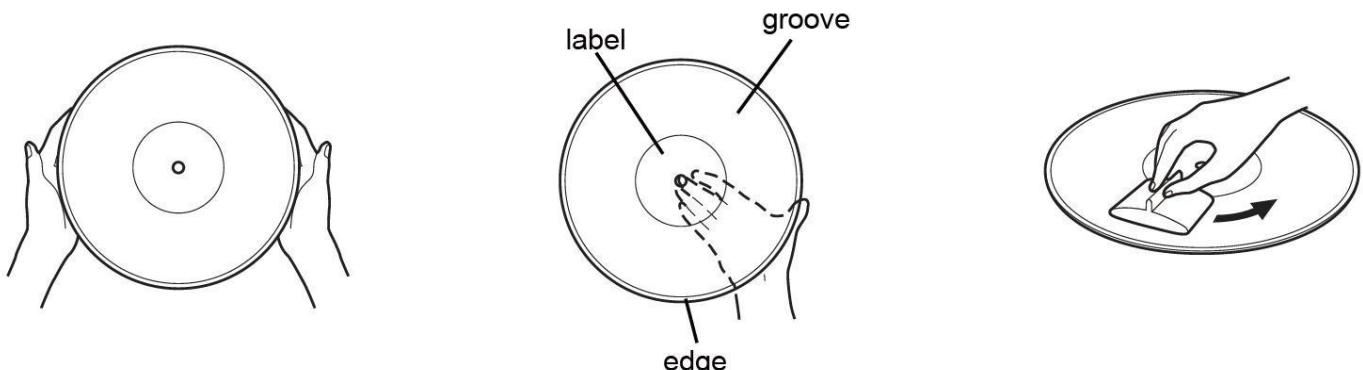

Doing so may damage the turntable mechanism or the unit.

WHEN MOVING THE UNIT

When changing the unit's location or packing the unit for moving, be sure to pack the unit carefully and securely. If the unit is to be packed and moved a great distance, it is also advisable to tighten the turntable transport locking screw.

HANDLING RECORDS

- Do not touch the record's grooves. Only handle records by the edges or the label. Make sure your hands are clean. Skin oils from even clean hands can leave a residue on the record surface that will gradually deteriorate the quality of your record.

- Should the record become dirty, gently wipe the surface in a circular motion, using a soft anti-static cloth.
- Keep your records away from dust. Keep them in a cool, dry place.
- To avoid dust and scratches, keep records in their sleeves and jackets when not in use.
- Store records upright on their edges. Records stored horizontally will eventually bend and warp.
- Do not expose records to direct sunlight or high humidity and temperature. Long exposure to high temperatures will warp the record.
- Do not store your records in the trunk of your car. The temperature in a closed trunk can ruin your collection.
- Store records in an area with a stable temperature and low humidity.

GETTING STARTED

General Operation:

1. Connected the unit to an AC power outlet as instructed below.

Ensure that the mains voltage of your home corresponds to the operating voltage of the adaptor. Your unit is ready to be connected to a mains voltage of 12V 2A DC adaptor.

- Connect the Power adapter to the A/C wall outlet.
- Connect the DC connector to the “DC IN” jack on the rear of the unit.

2. Turn the Power ON/OFF--Volume knob clockwise to power on the unit and set the volume to the desired level.
3. When you have finished listening to the unit, turn the Power ON/OFF--Volume knob counterclockwise until light is off.

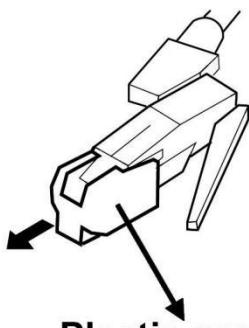

Amplifier Connection

Connect it to your existing speaker. Connect audio cable to the AUDIO LINE OUT sockets on the rear of the turntable.

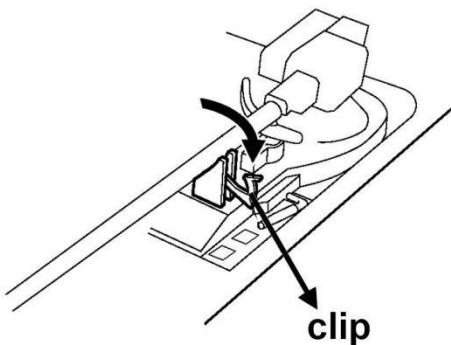

- Red plug into the Right Channel Input.
- White plug into left Channel Input.
