User manual

1.DPI switch key: 800-1200-1600, default value 1200

2. Power switch: Switch to ON for power on mode, and switch to OFF for power off mode

3. Mode Switching Button: The mouse has three modes, 2.4G (white light indicates); B T1 (blue light indicates); BT2 (blue light indicates). Pressing the mode button once switches the mode (2.4G->BT1->BT2->2.4G). Entering the corresponding mode, the indicator light will flash slowly, indicating that a connection is being made. If the connection fails, after 5 seconds, it will enter sleep mode, and the corresponding indicator light will turn off. If the connection is successful, the indicator light will also turn off, allowing the mouse to function normally. When in BT1 or BT2 mode, long-pressing the mode button for 3 seconds will enter Bluetooth pairing mode. The corresponding indicator light will flash quickly, allowing you to perform pairing operations on the main device such as a computer.

Mouse usage and Settings:

1. Take the wireless mouse and USB receiver out of the box, and plug the receiver into the USB port of the computer

joggle.

2. Turn on the power switch and switch the mode toggle to any mode. You can turn it on

The mouse was used for the first time. (Bluetooth mode only supports Windows8 and Chrome OS10.10.x

Or above system version)

frequently asked questions:

1. If the mouse does not work properly, check whether the power supply is connected

2. Check whether the USB receiver is connected properly, or replace the USB interface

3. If the charging is not possible, check whether the USB port and TYPE-C port are in poor contact

inoperation

Automatic hibernation and precautions:

1. If you do not use it for more than 30 seconds, it will automatically enter the light sleep mode, and if you do not use it for more than 10 minutes,

It automatically enters the deep sleep mode, which is an environmentally friendly and energy-saving design.

2. When you use it again, you can quickly wake up by pressing any key.

3. If you do not use it for a long time, it is recommended that you switch the power switch to OFF and completely shut down

Extend battery power consumption and battery life.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
FCC Radiation Exposure statement
The device has been evaluatec to meel general RF exposure requirement. The device can be used in portable exposure condition without restriction.
