

## Instructions

1. Connect the USB cable port to the power adapter and then plug the other side into the type-c port of the charging pad.

## NOTES

1. A lower power may result in longer charging time, charging errors or lower efficiency of charging. Charging with QC2.0/QC3.0 adapter is highly recommended.
2. Put the mobile phone on the charger pad, the LED light will turn to green and start charging your phone, as shown below.

## Specification

Product Name: Fast Wireless Charger

Input: DC5V/2A 9V/1.67A

Input Port: Type C

Output power: Max 15W

Model: O-07

Color: Black

## Caution

1. Please keep the charger away from water or other liquid.
2. If you need to clean the charger, please make sure it is not connected with power supply.
3. Do not place too close to magnetic stripe or clip card (ID card, bank cards, etc) to avoid magnetic failure.
4. Ensure to properly place the center of the phone's back on the position showed of the manual.
5. Remove any metal foreign material between the wireless charger and the phone as they can cause the device not to charge properly.
6. Some kinds of too thick bank covers may also halt the wireless charging. Please check the back cover of your phone, or remove the back cover and try to charge again.
7. If your phone has not built-in wireless charge receiver, when installing 3<sup>rd</sup> party wireless charging cards, be sure that it is installed correctly.
