Product parameters:

Product Name: B65
edition: V5.4
Chip: Qualcomm 3040
Frequency range: 2.402-2.480GHz
agreement: RX-A2D2 AVRCP TX-A2DP
Connecting devices: supports sending and receiving one to two
Supported formats: APTX SBC APTX-LL aptx-HD AD ACC
Battery specification: 250MA
Charging power supply: DCSV Type-C interface charging
Working hours: 20 hours
Size: 60 * 40 * 15mm
Product weight: 28g

Launch mode:

1: B65 can switch between transmission mode and reception mode by pressing a button. Power on check refers to is the indicator light in "TX" mode? Connect audio devices such as TV/computer through a 3.5mm interface. The device must be set to external speaker mode.
2: After the product is turned on, the TX pairing light flashes, entering Bluetooth search mode, and the receiver is turned on/off. The wired earphones/wireless speakers enter pairing mode. B65 will automatically select the Bluetooth found in the search. Connect and pair. The A light stays on after successful connection. Audio transmission can be achieved. If you need to connect the second one Device, click the A/B button, the product enters search mode, and the B light stays on after successful connection.
3: When you need to connect to the second device, click the A/B button, and the TX light will enter fast flashing mode. Re enter search mode, automatically search for Bluetooth receiving devices for connection, and the B light will remain on after successful connection.
4: The output music format can be switched by double clicking the play pause button.

Receiving mode:

1: Power on by switching between TX/RX buttons, check if it is in "RX" mode, and connect speakers/amplifiers and other devices through a 3.5mm audio cable.
2: After turning on, the RX light flashes and enters pairing mode. Turn on the Bluetooth of your phone or tablet, search for Bluetooth "B65", and click to connect. After successful connection, the A light stays on.
3: When you need to connect to a second phone, click the A/B

button, and the RX light will flash. Search for Bluetooth "B65" on the second phone or tablet, click connect, and the B light will remain on. Two devices can be connected.
4: When using Bluetooth for the second time, simply turn on the product and the phone will automatically reconnect.

special note

1: When the battery voltage drops below 3.1V, it will automatically shut down
2: In the absence of paired devices, it will automatically shut down after 5 minutes of startup.
3: If long-term use is required, connect the power cord DCSV and use it while charging. The product uses Type-C charging, and low battery voltage or use during charging may cause current noise
4: If prompted to enter pairing password when using B65, please enter "0000"

Packaging accessories: standard configuration

- 2: Type-C charging cable * 1
- 3: Instruction manual * 1

Warning Statement
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) The device may not cause harmful interference, and (2) the device must accept any interference received, including interference that may cause undesired operation.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause the interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.
This equipment complies with FCC radiation exposure limits and limits for an uncontrolled environment.
