

# SOKER

Model : RJ -WC9B15

Input : 5V/2A; 9V/1.67A; 12V/1.67A

Output : 5W/7.5W ( ios)/10W/15W

Transmission Distance:  $\leq 8\text{mm}$

Executive Standard : Qi Standard

Compatibility: Compatible with all

Qi-enabled phone

## Parts list

Wireless charging base \*1

Instructions \*1

Type-C Cable \*1

## Directions for use

1 : The wireless charging board is powered by a computer or adapter according to the input device supply power converted to its corresponding output power.

( To charge the mobile phone effectively, it is recommended to use QC/PD equipment)

2: After the connection is powered on, the indicator light will blink blue and then be steady on (in standby mode).

3: Place the device that needs to be charged on the wireless board, and the charging will start. The blue light then turns to the red light and switches to the blue light when it is full

## Attention

1: Do not throw the Magnetic wireless charger into fire and do not repair it by yourself

2: Protect the Magnetic wireless charger from moisture and water

3: A metal phone case/cover should be taken off from your smart phone when you use our Magnetic wireless charger

4: Disconnect the Magnetic wireless charger before you clean it

5: Do not use the Magnetic wireless charger in extreme cold or heat environment

**Note:** The product having overheat protection will automatically stop working when the temperature is too high during charging (light goes out). Please re-plug the charger if this happened.

FCC statement:

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
