

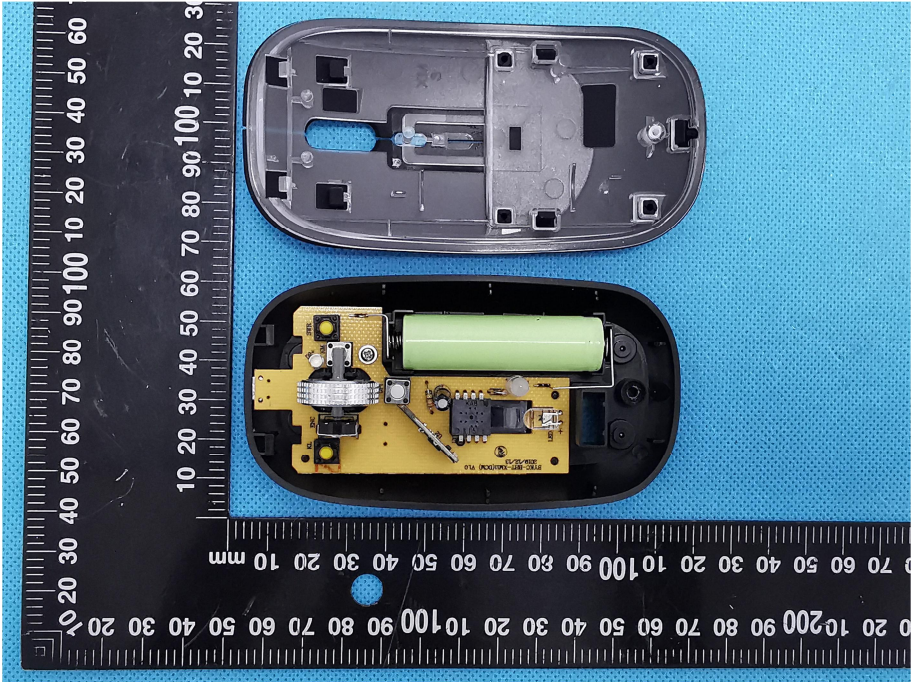

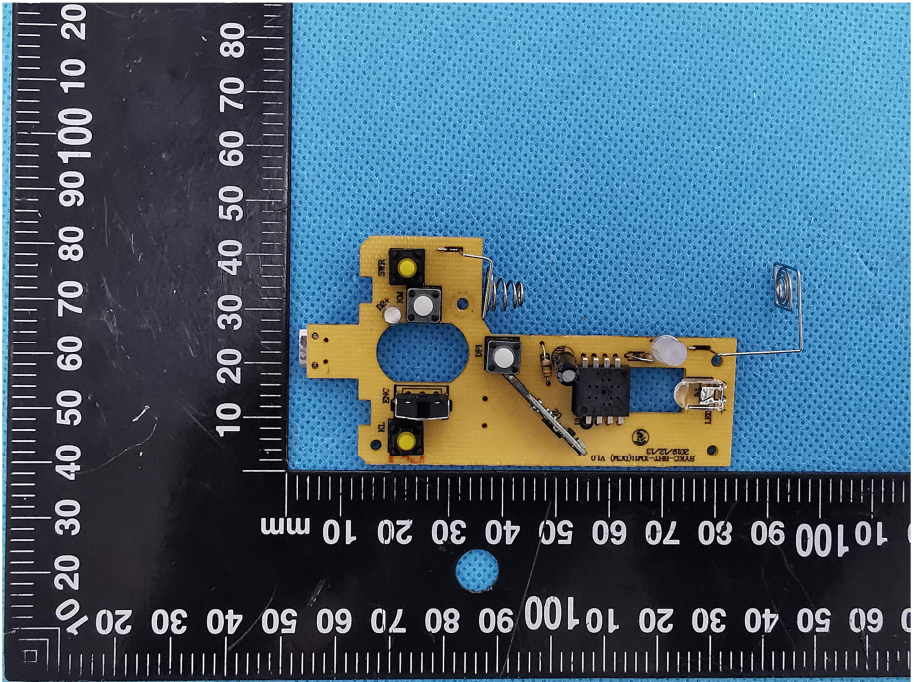

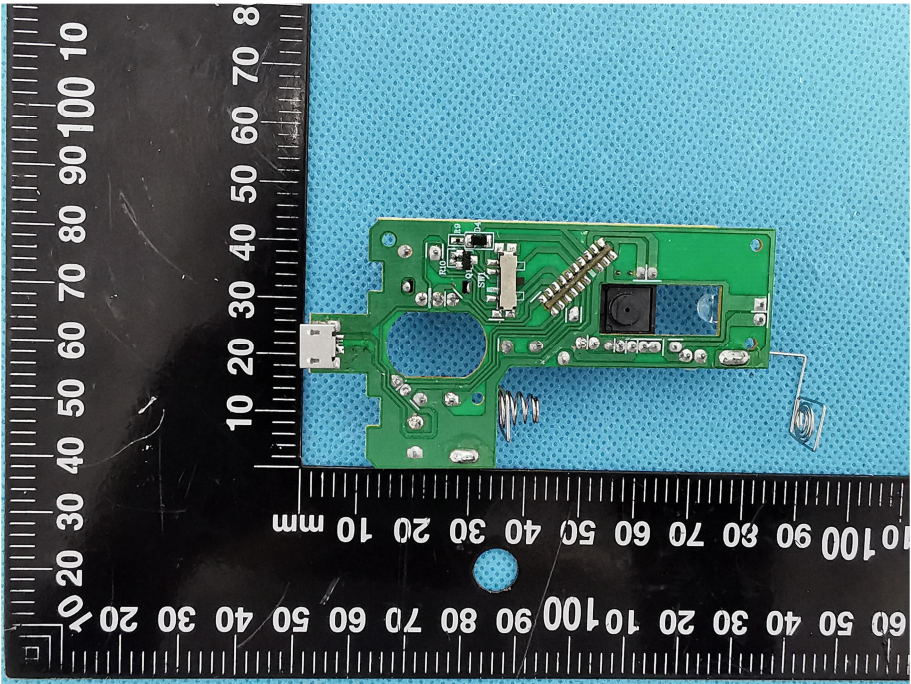

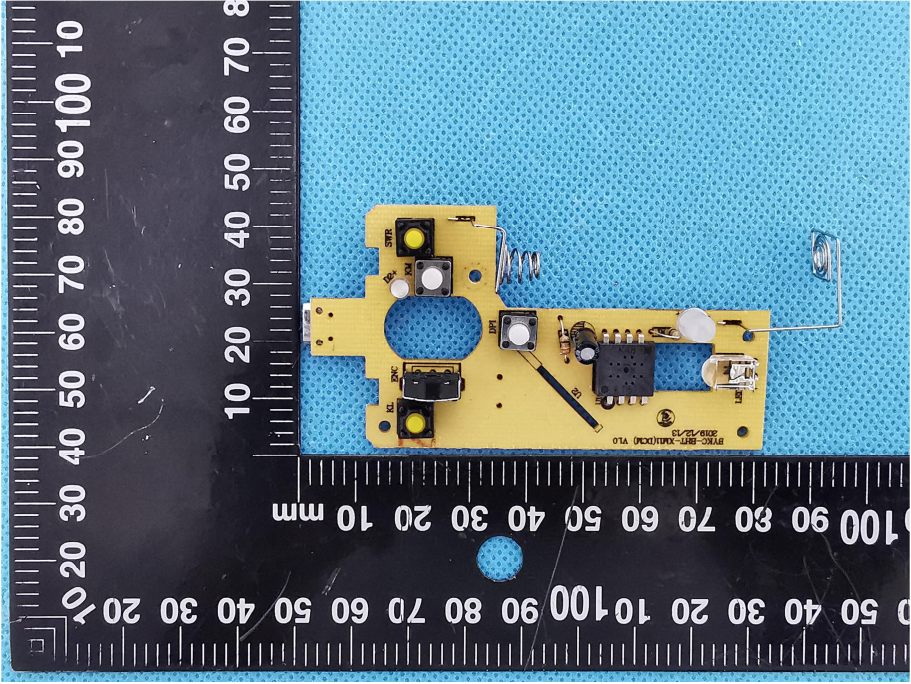

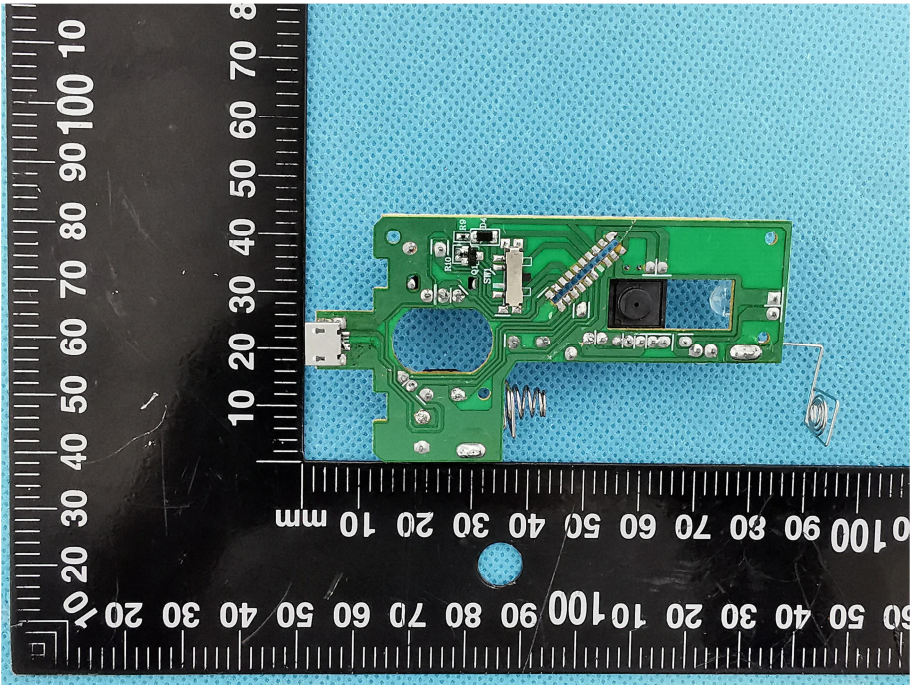

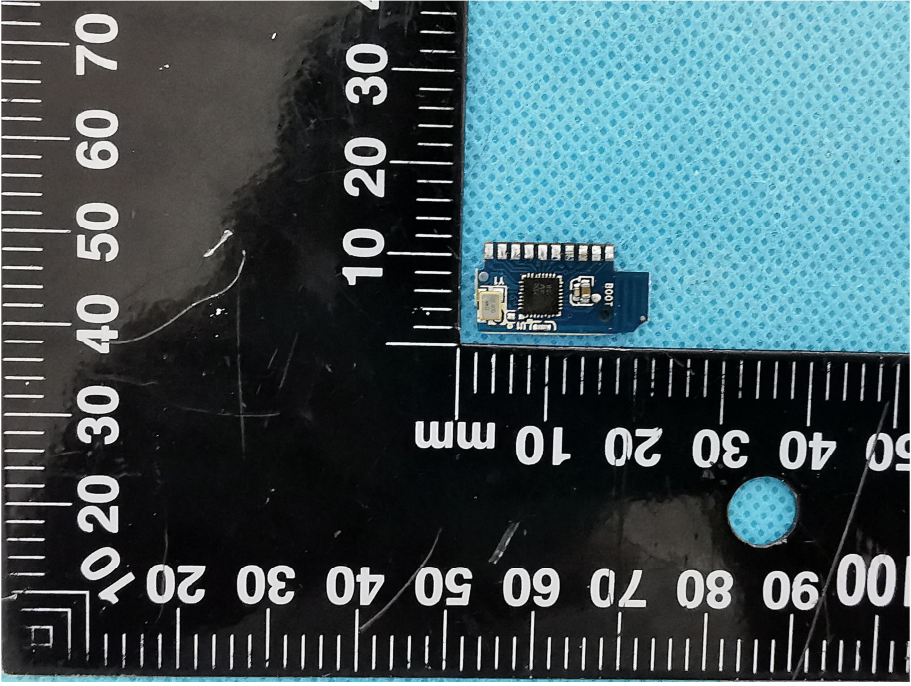

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (End User Terminal) housing. The top half shows the empty black plastic housing. The bottom half shows the same housing with a yellow printed circuit board (PCB) installed. The PCB features a green battery, various electronic components, and a small antenna. A black ruler with white markings is placed vertically to the left of the components for scale.
Solder Board-Component View 1	 A close-up photograph of the yellow PCB component. It shows various electronic components including a green battery, a small antenna, and several surface-mounted components. A black ruler with white markings is placed vertically to the left of the component for scale.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled '2', positioned on a blue textured surface. The component is irregularly shaped with a central circular cutout. It features various electronic components including a small black integrated circuit (IC), several resistors, and a silver-colored spring. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A vertical ruler is also visible on the left side of the component, showing measurements in millimeters (0 to 80 mm) and centimeters (0 to 8 cm).
Solder Board-Component View 3	 A photograph of a yellow printed circuit board (PCB) component, labeled '3', positioned on a blue textured surface. The component is irregularly shaped with a central circular cutout. It features various electronic components including a small black integrated circuit (IC), several resistors, and a silver-colored spring. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A vertical ruler is also visible on the left side of the component, showing measurements in millimeters (0 to 80 mm) and centimeters (0 to 8 cm).

Solder Board-Component View 4	 A photograph of a green printed circuit board (PCB) component, labeled '4', mounted on a blue textured surface. The component is rectangular with a central cutout and various electronic components including a microcontroller, resistors, and a small antenna. It is positioned next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 5	 A photograph of a small blue PCB component, labeled '5', mounted on a blue textured surface. The component is rectangular with a central cutout and various electronic components including a microcontroller, resistors, and a small antenna. It is positioned next to a black ruler with white markings for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
