

Automatic pet feeder

User Manual

PTM-40A1

List of materials

Product Introduction

Display screen Function Description

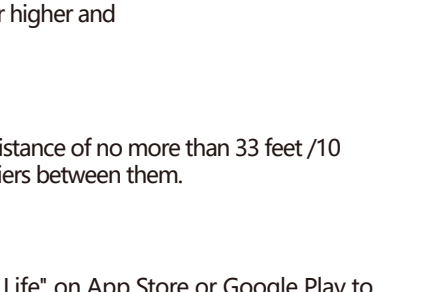

Product assembly

1. As shown in the figure, the support rods A correspond to A and B correspond to B, which are installed in the slots.

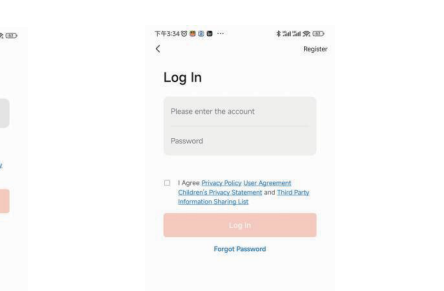

2. Assemble the stainless steel bowl and the plastic bowl, install them in front of the grain outlet, then fix their positions.

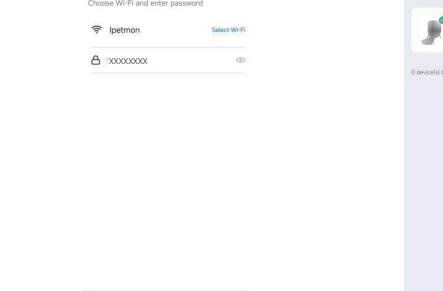

3. Put the grain-stirring rod into the grain storage bucket and the grain-stirring tray. It is connected to the corresponding position of the grain stirring rod. Twist the middle part A of the grain stirring tray in the direction.

4. Connect the grain-stirring rod, gears and grain storage bucket together, place them in the base and secure them. Slide the grain silo lock towards the key direction and lock it.

5. Install the main unit onto the grain storage barrel and adjust its position so that the display screen faces forward.

Note: APP language depends on your mobile default language.

7. If the desiccant bag is found to be damaged, please stop using it immediately and contact us to obtain a replacement desiccant bag.
8. If you stop using the feeder, unplug the power cable and remove the batteries properly. installed in the cover and store them properly.

Fault resolution

Problem	Solution
The feeder doesn't work	Check whether the power cord is properly connected Suspend the use of the battery and use the charging cable to see if it can continue to work Unplug the power cord, replace it with a new battery and check if it works
The screen doesn't respond	Press and hold for 3 seconds to unlock the display screen
The machine is stuck with grain or the display screen is not lit	Check whether the grain storage bucket and the grain outlet are kept dry Check if the food remains dry. Do not use wet food If you are not using the power cord, please replace the battery

FCC Warning

FCC Caution:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.

FCC Warning

FCC Caution:
