
Declaration on model difference

We the undersigned hereby confirm that SVP-AF01SB contains two sensors A and two sensors B. Sensor A and sensor B are identical except that sensor B has a distance sensor and a knee sensor. Both sensor A and sensor B have been tested. SVP-AF01UB contains one sensor A only.

The PCB LAYOUT, schematic diagram, antenna module and antenna of sensor A and sensor B are the same. The difference is that sensor B has two terminals, which are externally connected with a distance sensor and a knee sensor. The two external terminals have no wireless transmission function.
