Devices Name: BT-FAAH

- ⚠ **CHARGER AND BATTERY**
Slide cable out through the slit to connect to USB. Before using a different charger, check whether the specifications of the charger meet requirements. The recommended output voltage of the charger is DC5V/1.0-2.5V, and the recommended output current is 100 mA to 600 mA. A 5V/1A charging cable is recommended for the device. Do not use a fast-charging cable or a cable with a high current rating for a long time to avoid overheating or damage to the lithium battery. The sleep headphones headband will work with any USB-C cable. Connect the USB-C cable to USB charger (or computer USB port).

- ⚠ Please note that you MUST remove the control panel & speaker before washing the sleep headphones headband.

How to Wash Bluetooth Headband?

- 1 Push Bluetooth control panel with speaker out of its pocket
- 2 Pull speaker and Bluetooth panel out from Separated stitching of the headband
- 3 Take out and put them separately
- 4 Hand wash available

- Please try to restart your device if the sleep headphones headband keep cutting out.
- If you hear a low volume when you connect for the first time, try to adjust the volume key on your phone or tablet.
For warranty service or support, we promise: **FREE RETURN, FREE REPLACEMENT or FULL REFUND** to solve your issue and make you satisfied.

- FCC Warning**
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
