Upgraded New Design Soundbar with Subwoofer

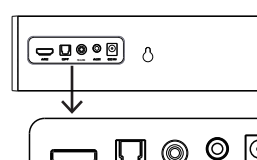

Customer service, please contact:
support@vibeaudio.com
(Respond within 24 Hours)

Step 1. Check Parts and Know Their Functions

Page 1/2 will briefly describe the functions of buttons and cables.

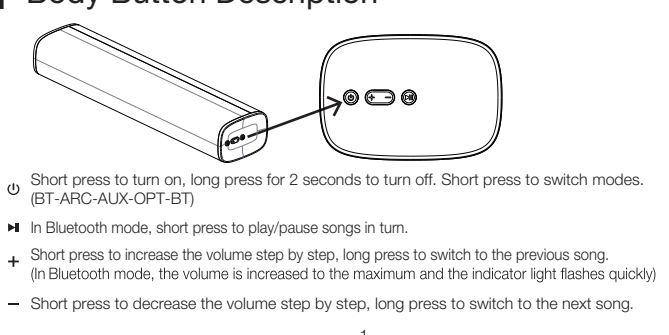

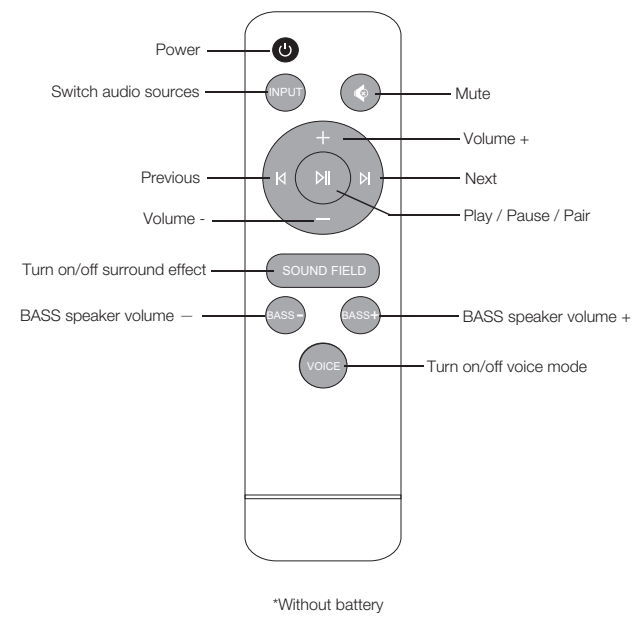

- 1 Power button
- 2 Play / Pause button
- 3 Volume + / Next button
- 4 Volume - / Previous button

- 5 ARC socket
- 6 OPT socket
- 7 AUX socket
- 8 DC IN socket
- 9 Subwoofer interface

Body Button Description

*Without battery

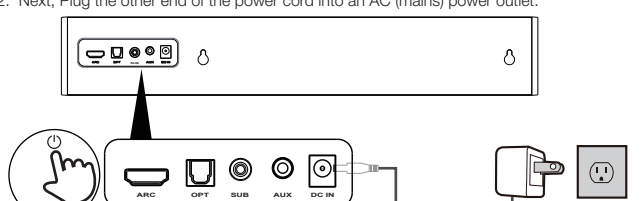

1. Make sure you have removed the protective caps from both ends of the cable.
2. Inserting the plug in the wiring orientation can damage the plug and the connector.

Step 2. Power ON/OFF

Power On

1. First, Connect the power cord to the DC IN port on the back of the soundbar.
2. Next, Plug the other end of the power cord into an AC (mains) power outlet.

Tips:

1. Plug the soundbar into a power source. Once it's connected, the soundbar LED indicator will turn RED.
- Note:** The LED light doesn't represent standby mode, but signals there's an active power source.
2. To turn it on, hold down the power button for 2 seconds or press the power button on the soundbar's remote. The LED will flash blue. (In default mode - Bluetooth mode).
3. To change the connection mode, press the "INPUT" button on the soundbar's remote or quickly press the power button.

For VIP Tech Support or a Free Lifetime Warranty for the soundbar and remote, please contact us at: support@vibeaudio.com

Power Off (For your information)

When you need to turn off the soundbar after use, you can refer to this section.

1. First, Turn off the soundbar by pressing the power button on the remote or the power button on the soundbar.
2. Next, Turn off the TV.

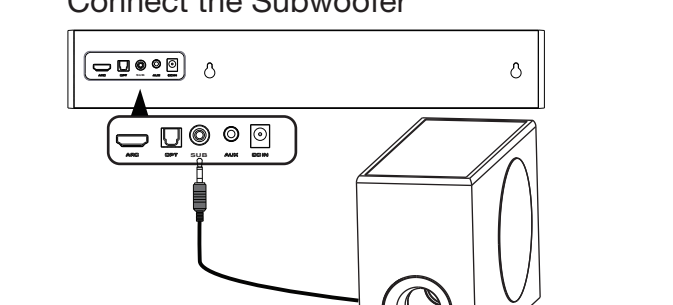

Note: Many TVs generate a significant audio impact signal when turned off. This signal can be transmitted to the soundbar, resulting in loud noise. Therefore, it is strongly recommended to turn off the soundbar first.

If the soundbar stops working unexpectedly, an overly strong signal may have activated the audio amplifier's protection system. To restore normal operation, follow these steps:

1. Unplug the power adapter from the wall outlet.
2. Wait a few seconds.
3. Plug the adapter back into the wall outlet.
4. Turn the device on.

If the issue persists, please refer to the troubleshooting section or contact customer support.

Connect the Subwoofer

1. Connect the subwoofer's included cable to the subhole on the soundbar.

Step 3. Turn ON

Press the power button on the soundbar remote to turn it on, the LED will flash blue. (In default mode - Bluetooth mode).

Remote control key description you may want to know:

ARC: Before plugging in the ARC cable, please press the "INPUT" button to set the soundbar to ARC mode. You can check the LED color (orange) to know if the mode is set.

OPT: Before plugging in the OPT cable, please press the "INPUT" button to set the soundbar to OPT mode. You can check the LED color (green) to know if the mode is set.

AUX: Before plugging in the AUX cable, please press the "INPUT" button to set the soundbar to AUX mode. You can check the LED color (white) to know if the mode is set.

BT: Press this button to set the BT mode, you can check the form below to know the status.

Mode	Status
AUX Mode	LED: stay white
Bluetooth Mode	BT mode LED: flash blue BT connected LED: stay blue BT disconnected LED: flash blue
OPT Mode	LED: stay green
ARC Mode	LED: stay orange

Install the Remote Batteries

1. Open the battery compartment cover on the back of the remote.
2. Insert the two AAA 1.5V batteries. Match the H and Z symbols on the batteries with the + and - markings inside the compartment.
3. Put the battery compartment cover back into place.

Note: According to local transportation regulations, batteries are not included in the package. Please prepare 2 AAA batteries for the remote control. Thank you for your understanding.

Step 4. Connect Soundbar with TV

1. Choose 1 connection according to your TV slots, such as Bluetooth/ARC/OPT/AUX.
2. The next pages are about connection steps for ARC/OPT/AUX/Bluetooth. You can find the specific page according to the title of each page and follow the steps of specific connection.
3. For wired connection: insert 1 cable to 1 rather than all cables.

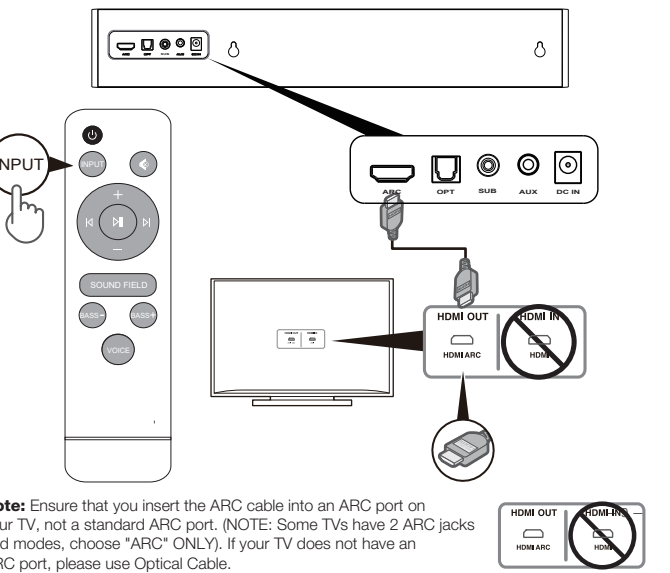

Option 1 (preferred): eARC or ARC

If you want to use an ARC connection, please keep reading. If you want to use other connections, please refer to other pages.

1. Insert one end of the ARC cable into your TV's eARC or ARC port.
2. Insert the other end of the cable into the eARC port on the soundbar.
3. Press the "INPUT" button on the soundbar's remote to switch modes until the LED shows orange. If the LED shows another color, please press the "INPUT" button again until it shows orange.

Note:

1. Insert one end of the ARC cable into your TV's ARC port, not a standard ARC port.
2. If your TV doesn't have an ARC port, it means you can't use an ARC connection and will need to try other connection methods, as your TV does not support ARC.
3. Some TVs have 2 ARC jacks and modes, choose "ARC" ONLY.

Note: Ensure that you insert the ARC cable into an ARC port on your TV, not a standard ARC port. (NOTE: Some TVs have 2 ARC jacks and modes, choose "ARC" ONLY. If your TV does not have an ARC port, please use Optical Cable.)

TV Settings (Different TVs have different paths)

After connecting, please set the TV sound mode according to your TV model. Please refer to pages 12-15 for different TV settings. Here are some common setup paths:

Path 1 SmartHome > Settings > Sound > Sound Out > External Speaker/External Audio > ARC > Digital Sound Out > PCM

Path 2 Settings > Sound > Sound Output > Audio Out > ARC > Digital Output Audio Form > PCM

Display	Audio in
General	Audio out
Desktop	Internal TV speaker
Voice	Optical
About	HDMI ARC

Tips: Some TVs require further setup, pls by path 3.

Path 3 SmartHome > Settings > Audio Output > ARC > Digital Output Format > PCM or Passthrough

Internal TV speaker	Digital Sound Out :AUTO
Optical	Digital Sound Out : PCM or Passthrough
HDMI ARC	Sound Sync

Some TVs require further setup. If there is no sound after connecting, enable ARC-CEC Device Control.

Path 4 Settings > Display and Sounds > ARC-CEC Device Control > On

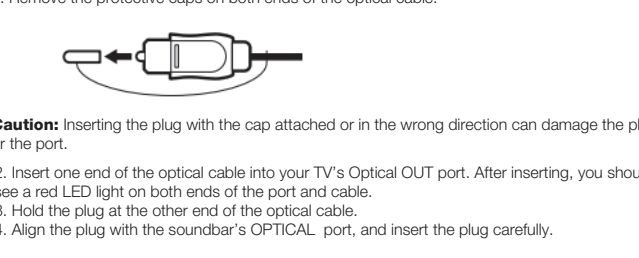

DISPLAY & SOUNDS
Screenmaster
HDMI-CEC Device control
Display & Sounds

Allow your TV to control connected CEC-enabled ARC devices using your TV remote. Playback, navigation, and power on/off can be accomplished via a single TV remote.

Option 2: Optical

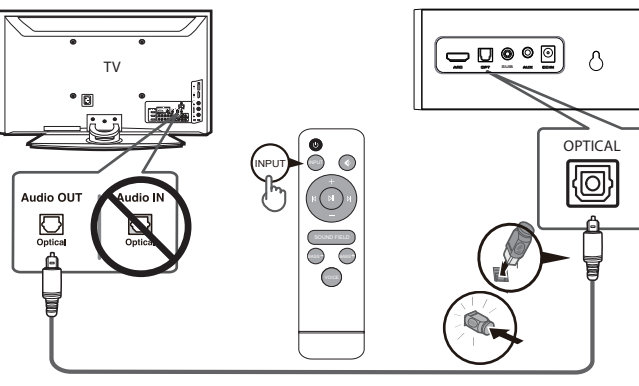

If you want to use an OPT connection, please continue reading. For other connection methods, please refer to the relevant pages in the manual.

1. Remove the protective caps on both ends of the optical cable.

Caution: Inserting the plug with the cap attached or in the wrong direction can damage the plug of the port.

1. Insert one end of the optical cable into your TV's Optical OUT port. After inserting, you should see a red LED light on both ends of the port and cable.
3. Hold the plug at the other end of the optical cable.
4. Align the plug with the soundbar's OPTICAL port, and insert the plug carefully.

5. Firmly push the plug into the port until you hear or feel a click.

6. Press the "INPUT" button on the soundbar's remote. The LED will turn solid green to indicate OPT mode. If the LED shows another color, press the "INPUT" button again until it turns green.

Note: If you do not see a Red LED light on the other end of the optical cable, this means your TV's Optical port is not working properly. Try ARC, 3.5mm AUX or Bluetooth connection.

TV Settings(Different TVs have different paths)

After connecting, please set the TV sound mode according to your TV model. Please refer to pages 12-15 for different TV settings. Here are some common setup paths:

Path 1 SmartHome > Settings > Sound > Sound Out > External Speaker/External Audio > Optical > Digital Sound Out > PCM

Path 2 Settings > Sound > Sound Output > Audio Out > Optical > Digital Output Audio Form > PCM

Display	Audio in
Sound	Audio out
General	Audio out
Desktop	Internal TV speaker
Voice	Optical
About	HDMI ARC

Tips: Some TVs require further setup, pls by path 3.

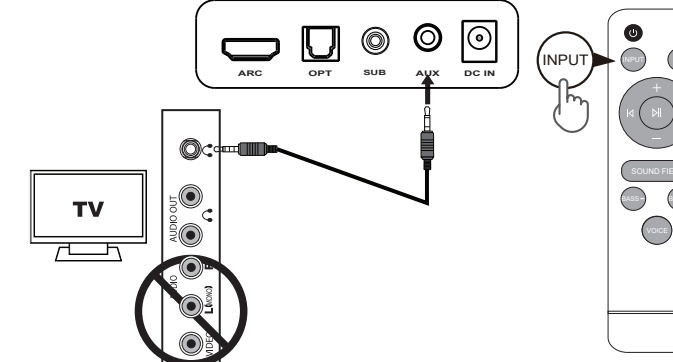

Path 3 SmartHome > Settings > Audio Output > Optical > Digital Output Format > PCM or Passthrough

Internal TV speaker	Digital Sound Out :AUTO
Optical	Digital Sound Out : PCM
HDMI ARC	Sound Sync

Option 3 : AUX

1. Insert one end of the AUX cable into your TV's AUX port.
2. Insert the other end of the cable into the AUX port on the soundbar.

Press the "INPUT" button on the soundbar's remote to switch modes until the LED shows white. If the LED shows another color, please press the "INPUT" button again until it shows white.

Note: Use an audio cable to connect to a TV jack labeled "LINE OUT" or "AUDIO OUT" or not Line IN or Audio IN or Video IN.

Note: Follow the steps above. If there is no sound after connecting, please try adjusting the TV settings further.

Display	Audio in
Sound	Audio out
General	Audio out
Desktop	Internal TV speaker
Voice	Optical
About	HDMI ARC

1. Settings > Sound > Audio out > Internal TV Speaker > Headset

Option 4: Bluetooth

1. Press the "INPUT" button on the soundbar's remote into Bluetooth mode. The LED turns blue, and light flashes.
2. On your device, turn on the Bluetooth feature.
3. Select "KYMiniE" from the list of Bluetooth devices. When connected, the LED light will remain blue.

Note: Long press the "BT" button for 3 seconds to disconnect Bluetooth, then quickly press it again to reconnect (Bluetooth mode only).

Tips: Follow the steps above. If there is no sound after connecting, please contact us at support@vibeaudio.com

Lifetime Warranty

For VIP Tech Support or a Free Lifetime Warranty for the soundbar and remote, please contact us at support@vibeaudio.com

If You Experience Problems With The Soundbar.

Try These Solutions First:

- Ensure the soundbar is connected to a live AC (mains) outlet.
- Secure all cables.
- Check the state of the soundbar.
- Move the soundbar within the recommended range of your mobile device for proper operation.

Other Solutions

Troubleshooting

Problem	Solution
Poor audio quality	<ul style="list-style-type: none">- Reduce the volume of your source device.Audio cable connection:<ul style="list-style-type: none">• Double clicking the boost button on the remote control to restore the volume.Bluetooth connection:<ul style="list-style-type: none">• Bring the Bluetooth device closer to the soundbar and make sure that no obstacles are disturbing the connection.
Remote control does not work	<ul style="list-style-type: none">- Ensure that the batteries are correctly inserted. If necessary, replace the batteries.- Bring the remote control closer to the soundbar and make sure there are no obstacles in between. Ensure the remote control is within 16.5 feet (5 meters) of the system.- Aim the remote control directly at the infrared receiver of the system.
System doesn't react	<ul style="list-style-type: none">- It is likely malfunctioning due to electrostatic discharge.- Unplug the power adapter for at least one minute and reconnect.
Bluetooth device cannot be connected to the soundbar	<ul style="list-style-type: none">- Bring the Bluetooth device closer to the soundbar.- Switch off your device and/or soundbar; then back on, repeat the pairing process.- Make sure the soundbar is not connected another Bluetooth device.- Make sure that you have selected Sine Audio from the Bluetooth device list on your device.- Ensure you are using the correct device. <p>If the device is still not connected, try the following:</p> <ul style="list-style-type: none">- Remove the soundbar from the list of "paired devices" on your phone/tablet.- Turn the soundbar off and then on again.- Pair it again with your phone/tablet. It should now successfully establish the pairing. <p>Note: If none of the above solutions work, the Bluetooth device may be malfunctioning. Try another Bluetooth device. If not even the new device can be connected, the soundbar may be malfunctioning. In this case, please consult your dealer for repair.</p>

Troubleshooting

Problem	Solution
No power	<ul style="list-style-type: none">- Check the power adapter is properly connected to an electrical outlet.- Check the DC plug is properly connected to the DC IN socket.- Unplug the power adapter for at least one minute and reconnect.
No eARC port on your TV	<ul style="list-style-type: none">- Use your TV's ARC port.- Use the optical cable to connect the soundbar to your TV.
No eARC, ARC or optical port on your TV	<ul style="list-style-type: none">- Please connect the TV using Bluetooth, 3.5mm audio cable, or RCA.
Soundbar doesn't power off	<ul style="list-style-type: none">- The soundbar may be in standby mode. On the remote, press the Power button  to wake the soundbar. Press  again to power off the soundbar.
Intermittent or no audio from soundbar	<ul style="list-style-type: none">- Play audio from a different application or music service.
No sound	<ul style="list-style-type: none">- Press the Power button on the soundbar or remote control to turn on the soundbar. The power indicator lights up green.- Press the MUTE button on the remote control to restore sound.- Ensure that the source device has correct volume settings and is playing a track.- Ensure the correct source device is selected.- Plug the audio cable into a connector on your TV labeled Line OUT or Audio OUT, not Line IN or Audio IN.Digital audio (SPDIF) connection:<ul style="list-style-type: none">• Plug the optical cable into a connector on your TV labeled Optical OUT or Digital OUT, not Optical IN or Digital IN.• Plug the RCA cable into a connector on your TV labeled Coaxial OUT or Digital OUT, not Coaxial IN or Digital IN.- Activate PCM(Pulse Code Modulation)in the audio settings menu of your source device(see your source device's user manual).- Connect to the headphone socket of TV:<ul style="list-style-type: none">• Increase your TV's volume to maximum.- Turn on your TV speakers. Refer to your TV's user manual for more information.

Troubleshooting

Problem	Solution
No sound	<ul style="list-style-type: none">- Restart your mobile device.- Make sure you're using a compatible Bluetooth mobile device.- Make sure that the soundbar's ARC cable is inserted into a port on your TV labeled eARC (Enhanced Audio Return Channel), not a standard ARC port. If your TV doesn't have an eARC port, connect to the ARC port. If your TV doesn't have an ARC port, connect to the soundbar using the optical cable.- If the soundbar is connected to your TV's eARC (or ARC) port, make sure that Pulse Code Modulation (PCM) or Consumer Electronics Control (CEC) is enabled in your TV system menu. Your TV may refer to PCM and CEC by a different name. Refer to your TV owner's guide.- Disconnect the ARC cable from your TV's eARC (or ARC) port and reconnect it.- Unplug the power cords for the soundbar, wait 30 seconds, and plug them firmly into a live AC (mains) outlet.
Sound is not coming from TV speaker	<ul style="list-style-type: none">- Make sure that the soundbar's ARC cable is inserted into a port on your TV labeled eARC (Enhanced Audio Return Channel), not a standard ARC port. If your TV doesn't have an e
