

H.265 HEVC/H.264 AVC/MPGE4

FHD Video/Audio Live Encoder

Manual

1.Interface

Power: DC 9-12V 1A

ANT: HG WIFI

HDMI IN: HDMI Video Input Port

Power: Power Light(Red)

Reset: Recovery to Default setting

LAN: Lan Status Light(Green)

LAN: 1000M Ethernet Port

Video: Video Signal Light(Blue)

WIFI: it is AP when it is blink, it is connected it is always bright.

Instructions:

- A. Power ----9-12 V/DC 1A;
- B. Reset---- it is used to reset the equipment; after the equipment is started, press the button for 10 seconds, the equipment IP is recovery to the default IP, 192.168.1.168.
- C. Video input --- it is used to input high-definition HDMI
- D. LAN ---- 100M or 1000M Ethernet connection.

2.Specification

Input

Video	1.4 HDMI HDCP
HDMI resolution ratio	1920x1200_60P, 1920x1080_50/60P, 1920x1080_50/60i, 1280x720_50/60p 720x576i/p 720x480i/p.
Encoding	H.265 HEVC or H.264 AVC Profile 4.2
Bitrate	16kbit/s ~ 32Mbit/s

Bitrate control	CBR/VBR
GOP	Adjustable

Audio:

Encoding	AAC AAC+ AAC++ MP3 MP2 AC3 G.711A/U
Re-Sampling rate	44100/48000
Bitrate	48K, 64K, 96K, 128K, 160K, 192K, 256K
Sampling precision	24 bit
Bitrate	64Kb/s~384Kb/s

System:

Network	100M/1000M Base-T Ethernet /WIFI 2.4G
Stream	UTP,HTTP,FLV,HLS,RTSP,RTMP RTP UDP(Multicast,Unicast) and ONVIF
Configuration interface	WEB operation interface or CGI Command
Updating	Software update

General

Size	89*103*29mm
Net Weight	0.3KG
Temperature range	-20~55°C(workable)
Power supply	9-12V/1A or 5V/2A
Power consumption	5W

3. System Setting :

3.1 Reset

there is a RST hole on the front panel which is used to conduct initialization reset for

the high-definition encoder. When the equipment is powered on, press the button and hold for 12 Seconds, when the power light is off, release the button, and all the parameters will be initialized. The initialized IP is 192.168.1.168.

3.2 Computer IP Address Setting

Computer IP can be set as 192.168.1.*. Note: anyone from 1—254, except for 168

3.3 Open IE Explorer

Fill <http://192.168.1.168> to address bar, Default user name: admin Pass: admin

3.4 Status Display

3.4.1 status: when there is video input, it will display resolution of the input, and if there is not status info,input is not correct, please check your video source or video cable.

Status
Running Time: 0000-00-00 00:05:49

Port

HTTP Port: [1-65500]

RTSP Port: [1-65500]

Instructions: in terms of IP address of the equipment, the factory default is 192.168.1.168. If you forget the IP address after modification, you can reset the equipment by pressing the rest button for 12 seconds when the equipment is powered on, and restore the factory default ip.

4.2 WIFI/AP SETTING

4.2.1 AP Mode

WIFI

WIFI

Wifi:

Wifi mode:

AP

Wifi ESSID:

Wifi password:

Wifi band:

Wifi channel:

AP (Access Point) mode is default wireless status.

Default AP name is AP_Encoder_XXXX, you can search hotspot on smartphone or laptop. Default pass is 12345678.

Wifi band supports 2.4G/5.8G

Wifi channel: if wireless transmit is jam, you can try to switch channel

WIFI Status

WIFI SSID: AP_Encoder_47752

WIFI IP: 192.168.8.8

WIFI MAC: 7C:A7:B0:35:5C:1C

You also can check ap information on status page.

4.2.2 WIFI Mode

WIFI

WIFI

Wifi:

Wifi mode:

WIFI Main Profile

Wifi List:

Wifi ESSID:

Wifi password:

Wifi DHCP:

Wifi IP:

Wifi netmask:

Wifi gateway:

Select WIFI mode, you can click Refresh to scan hotspot after reboot

Fill correct hotspot name and pass and wifi ip. Click Apply button, reboot
You will check the connection information on status page.

WIFI Status

WIFI: COMPLETED
WIFI SSID: HUAWEI-040M0N_5G
WIFI IP: 192.168.0.168
WIFI MAC: 7C:A7:B0:35:5C:1C
WIFI Level: 71%
WIFI Freq: 5.745 GHz
WIFI Max Bit Rate: 270 Mb/s

If the wifi level is under 60%, please check environment, it is better to visual range away from router.

5. Main Stream Encoding Setting

5.1 Encoding Setting of Main Stream

Main stream

Enable it

Click Apply button

7. Instructions for Facebook Streaming

1. Open live streaming page on Youtube

2. Copy rtmp address from Facebook

A screenshot of the 'Connect Your Live Stream to the Live API' interface. It shows instructions: '1. Choose where you want to post your broadcast on the right.' and '2. Preview your broadcast with a stream key or paired encoder.' A radio button for 'Stream Key' is selected. Below it, there are checkboxes for 'Use a secure connection (SSL)', 'Use a persistent stream key', and 'Use a backup stream'. A 'Server URL' field contains the value 'rtmps://live-api-s.facebook.com:443/rtmp/'. A 'Stream Key' field contains the value '143998560119176?'. Both fields have 'Copy' buttons to their right. At the bottom, it says '3. Select Go Live in the bottom right corner.'

The whole address(part 1+part 2) is

<rtmps://live-api-s.facebook.com:443/rtmp/143998560119176?bi=1&.....DIGXA>

9.3 System settings: Device reset and initialization default settings

Reset

Restore the device to factory settings.

Reset

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm etween the radiator & your body.
