

The statements should be displayed in the user manual:  
changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.  
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.  
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

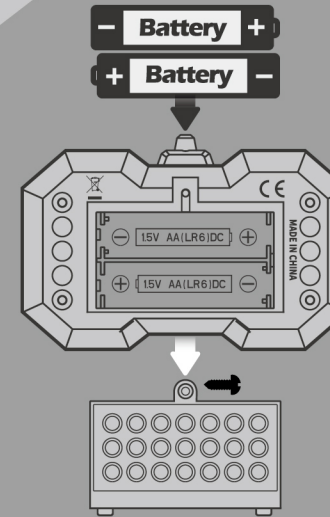

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Item NO: 8060

Product Name: BLOCKS TOYS SERIES

## R/C PARTS INSTRUCTION

POWER  
UNIT

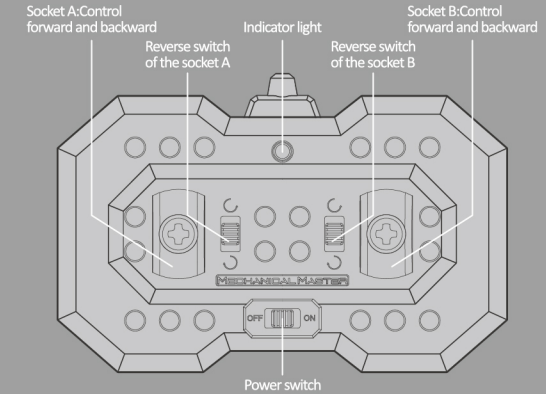

2x1.5V AA batteries(Not Included)

- 1.Install 2\*AA batteries to the controller.
- 2.Turn on the switch of the controller, indicator of the controller blinking slowly.Coding started.
- 3.325# APP programming motor box switch to ON direction, the blue indicator light is steady on, the pair coding is completed, and the controller indicator light will be steady on. If the light is still blinking, it indicates that the code pairing is failed.
- 4.Operate the function of remote control separately o test whether the corresponding function is normal.
- 5.When the power is going to be exhaustion, DC 5V 1 to 2A adapters are recommended. Use USB line to charge the core box. Red light steady on while charging, after fully charged, the red indicator light is off.
- 6.Scan the QR code, download and install APP, and complete the functions according to the instructions in APP.

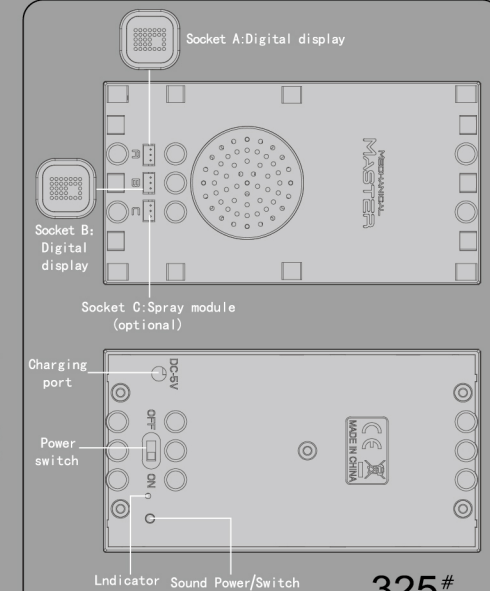

### Further instruction for 2.4G pair coding

- 1.Each controller can coding one Motor Box only.Once coding succeed,it would not influence theother Motor Box.It means many items can play at the same time.do not influence each other.
- 2.If the coding over 10 mins fails, or without any operation after coding succeed, the Motor box will be auto power off.
- 3.To coding the controller with another Motor Box,it needs to turn off the pair of controller and Motor Box both first,and then start coding with another one.
