

Mini Bluetooth Barcode Scanner

Barcode Scanner

Features

- ▶ Wired, wireless and bluetooth triple-mode freely switching.
- ▶ Large capacity storage, safe and reliable.
- ▶ Stores barcodes more than 50000pcs off-line scanning.
- ▶ Unique power management system, ultra-long standby time.
- ▶ Rich symbologies supported
- ▶ Adopting imported trigger button, long lifespan, fitting perfectly in your hand for comfortable use.
- ▶ Support Android/iOS devices/Windows
- ▶ Support HID, SPP, BLE protocol
- ▶ Mini size, fashion design, and portable
- ▶ Ultra low power consumption and standby time setup available
- ▶ Bluetooth transmission distance: indoor transmission distance up to 15 meters.
- ▶ Support upload data and charge the battery via USB cable at the same time.

Performance Parameters

Wireless protocol: bluetooth
 Memory: 16Mb
 Processor: ARM Cortex 32bits
 Bluetooth version: Bluetooth 4.1 Module
 Supported symbologies: 1D: Codabar, Code 11, Code 93, MSI, Code 128, UCC/EAN-128, Code 39, EAN-8, EAN-13, UPC-A, ISBN, Industrial 25, Interleaved 25, Standard 25, 2/5 Matrix, 2D: QR, DataMatrix, PDF417, Aztec, Hanxin, Micro PDF417 (optional)
 Indicator: Led, Buzzer, Vibrator (optional)
 Battery capacity: 650mA
 Charging voltage/current: 5V/1A
 Endurance: 1D ≤ 12H 2D ≤ 8H (5seconds/scan)
 Charge time: ≤ 2hours
 Standby: > 30days

Working Conditions

Working Temperature: 32°F to 104°F/0°C to 40°C
 Storage Temperature: -40°F to 140°F/-40°C to 80°C
 Humidity: 5% to 95% relative humidity (no condensation)
 Ruggedness: Resist about many times drops from 1.5m to concrete ground
 Ambient Light Immunity: Under normal office and factory ambient lighting conditions, or exposed to the sun won't take any effect to it.
 Electrostatic discharge: In line with 15KV air discharge and 8KV contact discharge requirements

Button Description

LED Indicator

Indicator Color	Description
Blue light flicker and extinct fastly	Read barcode successfully and make a short sound
Red light-the charge lamp	Red light on means Charging state, after full, it will be off.
Red light flashes	No battery detected while charging

Buzzer

Buzzer Proformance	Introduction
One/long beep low to high frequency	Power on
One/long beep high to low frequency	Power off
One/short beep low frequency	Read a code under normal mode
One/short beep low to high frequency	Read a code under storage mode
One/short beep high to low frequency	Read a setting mode
Three/short beeps low frequency	Transfer failure or storage space is full

Connections Introductions

A: When using 2.4G feature, you can match desktop PC or PC terminals that do not support Bluetooth. Scanner supports systems such as XP, Win7, Win8, Win10, etc.

B: When using Bluetooth, you can match Android, IOS mobile phones, or PC terminals with bluetooth capabilities.

C: Plug in the data cable with the USB end connected to the computer, you can charge the scanner and use it as wired scanner synchronously

Reset Configuration to Defaults

If you scan other set-up barcode by mistake and the scanner doesn't work as normal way, you can scan the initialization setup barcode to revert

2.4GHz Wireless Pairing Steps

How to connect with users device through 2.4GHz wireless?

Step1: Scanning following two setting codes one by one

Step2: Inserting wireless dongle into USB port of users' device. When you hear one beep, barcode scanner and users' device get connected through 2.4GHz wireless.

Note: when barcode scanner enters into pairing status, but it doesn't get paired with any device within 1 minute, it will exit from pairing status automatically. Users need to repeat step 1 & 2 to pair.

Bluetooth Pairing STEPS

How to connect with users device through bluetooth?

Step1: Pressing scanning button for 8 seconds or scanning following setup code "HID Pairing Setup Barcode" until LED flashing.

Step2: Turning on the Bluetooth of user's device, and find "BarcodeScannerHID" device in the menu, click it. When you hear one beep, barcode scanner and user's device get connected through bluetooth

Note: when barcode scanner enters into pairing status, but it doesn't get paired with any bluetooth device within 1 minute, it will exit from pairing status automatically. Users need to repeat step 1 & 2 to pair.

Standby Time Settings

Standby after 1 min

Standby after 5 mins

Standby after 10 mins

Standby after 30 mins

Never enter Standby

Standby Immediately

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The device has been evaluated to meet general RF exposure requirements, the device can be used in portable exposure condition without restriction

Working Modes

Normal Mode:Transferring every data instantly after each scanning.Scanning following setup code into "Normal Mode"

Normal mode

Storage Mode:Storing data into barcode scanner first after each scanning. When the distance between barcode scanner and users device beyond bluetooth or 2.4GHz wireless transmission distance,storage mode is suggested.

Storage mode

Scanning following setup code"Total stored data amount "to check the total amount of storing data

Total stored data amount

Working Modes

Scanning following setup code"Upload Data"to upload data of barcodes you scanned under storage mode to your device.

Data Upload

Note:Please confirm that barcode scanner and users' device get connected through bluetooth,2.4GHz wireless or USB cable before uploading data.

Scanning following setup code"Clear Data"to clear empty the data stored in the barcode scanner

Clear Data

2.4G Wireless COM-Port Mode Setting

Step1:Scanning setting code"COM-Port Mode"

COM-Port Mode

Step2:Scanning setting code"Enter Pairing Mode"

Enter Pairing Mode

Step3:Insert the 2.4G wireless receiver into USB port in your device.One beep show that scanner and receiver connected.And it will generate a COM port in your device.

Notes:When the scanner is entered 2.4G COM-Port Mode pairing status and it does not get connected with your device within 1 minutes,it will beep twice lowly and longly. You need to repeat above-mentioned 3 steps to make it connect with you device. (When the scanner is in the 2.4G COM-Port pairing status, double-click can make it exit the pairing mode).

Note: When entering a virtual serial port, the wired output is also a virtual serial port. (Some computers require drivers to be installed)

Pull up and Hide IOS Keyboard

Pull up and Hide IOS Keyboard

Trigger twice to pull up iOS keyboard

Trigger twice to disable iOS keyboard
