08 Wating for connecting

09 PetFeeder Added Successfully

Tips:

1. If the connection fails in both ways, please try the following:

1)-- Long press the reset button for 10 seconds to reset

2)--Repeat to check whether the wifi name and password are entered correctly (The APP will not prompt if the wifi name or password is entered incorrectly)

2. If the device was offline as wifi network is unstable or the power goes out and etc. You just need re-connect the pet automatic feeder again:

Step1: Please place pet automatic feeder and your phone close to the router .

Step2: Reset this pet feeder : Press the 'Feeder' button ,Hold it down for about ten

seconds, then you hear a beep and it reset.

Step3: Start to pair with your phone.

7. Product Cleaning and Maintenance

After using the product for a period of time, you should use detergent to clean the Food Bowl and Grain Barrel, so as to avoid leaving food residue for too long to cause bacteria, affecting the health of pets.

Note: Please remove the desiccant from the Desiccant box in advance when cleaning the top cover.

1) The upper showed machine parts can be removed from the Main feeder and cleaned with detergent and water.

2) The drying box in the upper cover is rotated counterclockwise to remove it.

3) There have a 'Grain drum separation switch' in the grain barrel ,Rotate it slightly to the right , easy to lifts the food hopper . Tips: After you cleaned ,you need to install the food hopper carefully on the tray, make sure there is no any gap, and then turn the 'Grain drum separation switch' slightly to the left.

4) Remove the Food Bowl by pulling it down.

5) After cleaning, it must be dried or air-dried before assembling into the whole machine.

Note: The Pet Feeder is suitable for pet dry food less than 12mm,while frozen dry food is not available. Please keep the product inside dry to prevent bacteria.

8. Attentions

1. A pet feeder can only log in with one account, but it can be shared with up to ten users.

2. An account can be logged in on multiple mobile phones. If you want more than one person to operate at the same time, it is recommended to log in with the same account on different mobile phones.

3. If you want to connect the pet feeder with another account, please unbind the feeder from the original mobile phone first， if you cannot do this or the feeder is out of power, you can directly press

and hold the feeder reset button to restart the device.

4. Please place the product properly to prevent the pet from tipping over. This device is only suitable for small and medium-sized pets under 20kg.

5. Please replace the desiccant in the Desiccant Box regularly.

6. Please keep the Food Barrel dry and check regularly for food residue.

7. Do not pour any substance other than pet dry food into the Grain Barrel, otherwise it will cause abnormal use of device and even cause pet safety problems.

8. To prevent the pet from falling over the product, it is recommended to place it in the corner or against the wall.

9. The anti-bite wire of the product should be installed secretly as far as possible, so as to avoid the damage of the device caused by pets tearing the wire.

10.If children use this device, please make sure to use it under adult guidance

11.After installing the spare dry battery to provide normal power supply, manual feeding can be performed in case of power failure.

12.Grain barrel and food bowl should be cleaned regularly

9. Common Questions

Q: If the feeder goes offline will it still feed?

A: Yes, it's will still feed your pets ,our this pet feeder come with memory.

Q: The feeder is not connected. What is the problem and how to deal with it?

A：1、Check if the machine is normal, check the status of the device indicator light. After normal start-up, the blue indicator light flashes, and the connection to the network often lights up，and a beep beeps in front of the matching network.

2、If re-installation is needed, please authorize the APP to obtain location information and access network permissions. Follow the steps specified in the manual, and input the correct WIFI password. If you encounter any difficulties, please contact the customer service immediately.

Q:When connecting the feeder,sometimes it can be connected normally,sometimes not, how to deal with it.

A:Check if the machine's food outlet is blocked, at that time ,the blue indicator is always on.

Q: Why is it that sometimes you can't feed your pet at regular intervals?

A: Check if the product's food outlet is blocked and the blue light is always on.

Q: Why does the feeding time differ by tens of seconds from the current time.

A: The parameters set on the APP will have an error of 30 seconds depending on the network environment.

Q: How to reconnect quickly after the machine disconnects from the network?

A: 1. Method 1: Exit the APP and re-enter, and wait for data update

2. Method 2: Switch from feeding interface to video interface and wait for video update

Q: Feeder requirements for network type

A: The Feeder must use a WIFI signal that satisfies wifi802.11bgn protocol.

Only works with 2.4Ghz network.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two

conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
