USAGE TIPS

1. Make sure your devices are charged-enabled.
2. Make sure the V7 is fully charged before using it for the first time.
3. Turn off the speaker when it is not used, as well as before storing it.
4. In order to protect the circuitry of the speaker and ensure the long-term performance of the built-in battery, do not turn on the speaker while it is charging. Also, V7 does not support this function.
5. To protect the long-term performance of the built-in battery, do not use or keep V7 in a hot environment (above 60° C/140° F), such as in a hot vehicle or under direct sunlight.
6. Do not expose the V7 or any of its accessories to liquids.

反面

purchas.

Any damage or malfunction resulting from improper use or unauthorized disassembly or repair will not be covered by our warranty.

We also take no responsibility for products purchased from unauthorized retailers.

For detailed information, please contact our customer service.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
