# Caution

## Installation Precautions

Cartreque Digital Media Receiver suggests against self-installation of the product.

It is recommended to have it professionally installed by a certified professional.

Always seek advice from a professional installer before installing the product.

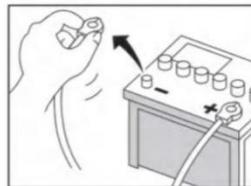

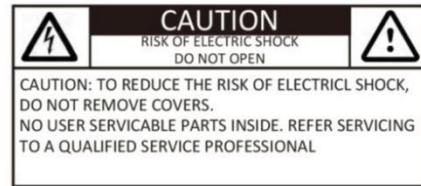

It is strongly advised not to install or service this product by yourself.

The installation or servicing of this product by individuals without professional training and experience in electronic equipment and motorized vehicle accessories can be hazardous and may pose the risk of electric shock, injury, or other hazards. Any repairs required should be directed to a qualified Cartreque Digital Media Receiver Service Center.

## Before Installing

To prevent potential electrical shorts, it is essential to disconnect the (-) battery cable before installing the product.

Utilize this unit with a 12-volt battery and negative grounding exclusively. Failure to follow these guidelines could lead to a fire or malfunction.

## Product Safety

According to Federal and Local laws, it is prohibited for drivers to view video content while the vehicle is in motion. This video product is specifically designed to be used with the parking brake safety feature, which is necessary for viewing the video content. The video cannot be viewed without the proper parking brake powered connection. Any attempt to tamper or disable this safety feature will invalidate any existing warranty. To ensure that the product is installed correctly, please consult with a professional installer.

## Customer service:

## Backup Camera Setup:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum 20cm distance between the radiator and your body: Use only the supplied antenna.
