How to use:

Connect the USB cable and the indicator light will flash once and then go off after the device starts. At this time, the self-test of the device is completed. Press the Watch Pop-up button, and put on the corresponding device for charging.

Special note:

It is necessary to install the rising silicone for mobile phones when charging the iphone 12/13MINI (all mobile phones of the remaining sizes are not required to be installed. The mode of installation is as shown in the figure below)

Warning

- Please keep this product out of the reach of children.
- Please keep this product away from heat dissipating appliances such as radiators, or flammable and explosive items.

- Do not use this product with wet hands or in wet areas.
- Do not disassemble this product by yourself. In case of technical assistance, please contact the supplier or hire a qualified repairer.

Troubleshooting

1. When to reset

In case the product is not used for a long time, the product will automatically enter into a sleep state, and in case it cannot be charged due to a sudden power failure, it can be restored after reconnecting the power supply.

2. No charging

If the indicator light flashes rapidly while this product is charging, it proves that a metal is detected by the charging coil (foreign object detection is activated). Please remove

relevant metals and then charge again. If the failure is not removed, please unplug the power and restart this product for normal use.

3.Slow charging

- 1)Please use the adapter that supplied with this product, or other original adapters above QC3.0.
- 2)Check if the corresponding device is aligned with the charging coil.

FCC Warning Statement: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure Statement

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located for operating in conjunction with any other antenna or transmitter.
