RE: Part 15 Subpart E U-NII 6GHz Attestation Letter

To whom it may concern:

We, Hak5 LLC attest that this device under FCC ID: **2A52Y-MK1** complies with the device protocol requirements and operational restrictions noted in Part 15E of the FCC's rules for 6GHz band for Indoor Client 6XD:

**1. Device Protocol Attestation Statement**

- a. Contention-Based Protocol, as demonstrated in the test report.
- b. The device will only associate and connect with a low-power indoor access point or subordinate device and never connect directly to other client devices
- c. This device will always initiate transmission under the control of a low-power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a timeout mechanism such that if it does not receive a response from an AP it will not continuously repeat the request.
- d. Transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.

**2. Statement acknowledging device restrictions (Users are notified of these restrictions through the user manual)**

- a. This device is prohibited for control of or communications with unmanned aircraft systems, including drones.

Sincerely,

**Darren Kitchen**  
Manager
