

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled '4', positioned on a blue textured surface. The component is rectangular with several silver-colored solder pads and a small integrated circuit (IC) mounted on it. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 100.
Solder Board-Component View 5	 A photograph of a larger green printed circuit board (PCB) component, labeled '5', positioned on a blue textured surface. The component is rectangular and densely populated with various electronic components, including numerous surface-mount components, a large integrated circuit (IC), and a yellow component labeled 'Panasonic'. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (mm) from 0 to 100.

Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) populated with various electronic components. The components include a large blue electrolytic capacitor, a yellow toroidal inductor, several resistors, and integrated circuits. The board is placed on a black surface with a white millimeter ruler for scale. The ruler shows dimensions in millimeters, with markings every 10 mm and sub-markings every 1 mm.
Solder Board-Component View 7	 A photograph of the reverse side of the green PCB. It shows the solder pads and traces for the components. The board is placed on a black surface with a white millimeter ruler for scale. The ruler shows dimensions in millimeters, with markings every 10 mm and sub-markings every 1 mm.
